

# We're exploring alternatives to the 405.

## SEPULVEDA TRANSIT CORRIDOR Fact Sheet

### ALTERNATIVE 5

**MODE**  
Automated heavy rail

**ALIGNMENT**  
Underground

**LENGTH (MILES)**  
14

**# OF STATIONS**  
8 (1 aerial, 7 underground)

**SOUTHERN TERMINUS**  
Expo/Sepulveda

**UCLA CONNECTION**  
Station under campus

**MAINTENANCE AND STORAGE FACILITY**  
West of Woodman/South of Metrolink VC Line

- STATIONS**
- > Metro E Line/ Sepulveda\*
  - > Santa Monica Bl\*
  - > Wilshire Bl (Metro D Line)\*
  - > UCLA Gateway Plaza\*
  - > Ventura Bl\*
  - > Metro G Line\*
  - > Sherman Way\*
  - > Van Nuys Metrolink Station\*\*

\*underground  
\*\*aerial

### ALTERNATIVE 6

**MODE**  
Driver-operated heavy rail

**ALIGNMENT**  
Underground

**LENGTH (MILES)**  
12.6

**# OF STATIONS**  
7

**SOUTHERN TERMINUS**  
Expo/Bundy

**UCLA CONNECTION**  
Station under campus

**MAINTENANCE AND STORAGE FACILITY**  
West of Woodman/South of Metrolink VC Line

- STATIONS**
- > Metro E Line/Bundy
  - > Santa Monica Bl
  - > Wilshire Bl (Metro D Line)
  - > UCLA Gateway Plaza
  - > Ventura Bl
  - > Metro G Line
  - > Van Nuys Metrolink Station

### Environmental Process

Metro is preparing an Environmental Impact Report (EIR) under the California Environmental Quality Act (CEQA) and an Environmental Impact Statement (EIS) under the National Environmental Policy Act (NEPA). The Draft Environmental Impact Report (DEIR) will include project alternatives that represent a range of rail transit modes, alignments and station locations for addressing the transportation needs of the Sepulveda corridor. The Draft EIR release is anticipated in early 2025, assuming receipt of all technical documents from the design teams. Once the DEIR is completed, it will be circulated for public comment. Then, a Locally Preferred Alternative (LPA) will be recommended to the Metro Board of Directors in the summer of 2025. After the LPA is identified, the Final Environmental Impact Report (FEIR) and the Draft and Final Environmental Impact Statement (EIS) will be prepared to complete the environmental review process. During this process, there will be multiple opportunities for the public to review and comment on the project alternatives and the environmental analysis.

#### Topics for environmental study under CEQA include:

- > Air Quality
- > Land Use and Development
- > Community and Neighborhood
- > Noise and Vibration
- > Cumulative Impacts
- > Parklands and Community Facilities
- > Ecosystems and Biological Resources
- > Real Estate and Acquisition
- > Energy
- > Safety and Security
- > Geotechnical, Subsurface, and Seismic Hazards and Hazardous Materials
- > Transportation
- > Greenhouse Gas Emissions
- > Tribal Cultural Resources
- > Growth Inducement
- > Utilities and Service Systems
- > Historic, Archeological and Paleontological Resources
- > Visual Quality and Aesthetics
- > Water Resources
- > Wildfire

### Nearby Projects

The Sepulveda Pass—including Sepulveda Boulevard, the I-405 and canyon roads—is a complex and challenging area. To address these challenges, Metro is evaluating a variety of projects that could offer a range of multimodal mobility options to address existing and future transportation needs. Projects are closely coordinated, with unique processes and distinct schedules.

#### I-405 Sepulveda Pass ExpressLanes

Metro is working in coordination with the California Department of Transportation (Caltrans) to evaluate alternatives to convert the existing high-occupancy toll (HOV) lanes to dynamically-priced, high-occupancy toll (HOT) lanes, called ExpressLanes, in both directions of I-405 between I-10 and US-101.

The I-405 Sepulveda Pass ExpressLanes Project will include a new overhead tolling system and signage on adjacent portions of the I-405 corridor. More information is available at [metro.net/405ExpressLanes](https://metro.net/405ExpressLanes).

#### Traffic Reduction Study

Metro's Traffic Reduction Study is exploring how to reduce traffic through congestion pricing and high-quality transportation options. Additional information on the Traffic Reduction Study is available at [metro.net/trafficreduction](https://metro.net/trafficreduction).

### CONTACT US

Metro invites you to stay involved and share your feedback.

## Overview

Metro has a plan to make it easier to get around. The natural barrier created by the Santa Monica Mountains makes traveling between the Valley and the Westside challenging—and will require innovation and multiple solutions. Metro is studying several projects in this area, including a new rail line with the Sepulveda Transit Corridor Project.

Metro is conducting an environmental review for the Sepulveda Transit Corridor Project, which will create a high-quality, reliable rail transit service alternative connecting the San Fernando Valley and the Westside. In addition to providing local and regional connections to the existing and future Metro rail and bus network, the proposed project can improve access to major employment, education, healthcare and cultural centers in the greater LA area.

## Goals

For this project, Metro has established six goals:

- > Improve mobility
- > Improve accessibility and promote equity
- > Support community and economic development
- > Protect environmental resources and support a sustainable transportation system
- > Provide a cost-effective solution and minimize risk
- > Enhance resiliency

## Funding

Funding for planning and construction of the Sepulveda Transit Corridor is provided partially by Measure M with the project scheduled to open between the San Fernando Valley and the Westside in 2033–2035 (\$5.7 billion) and a future extension to LAX opening in 2057–2059 (\$3.8 billion).

## Project Development Process

This project is currently in the planning phase. An environmental review is underway analyzing five alternatives with varying potential routes and modes. Metro is working with two private sector design teams, LA SkyRail Express (monorail) and Sepulveda Transit Corridor Partners (heavy rail), under a first-of-its-kind pre-development agreement to potentially accelerate delivery of this project.

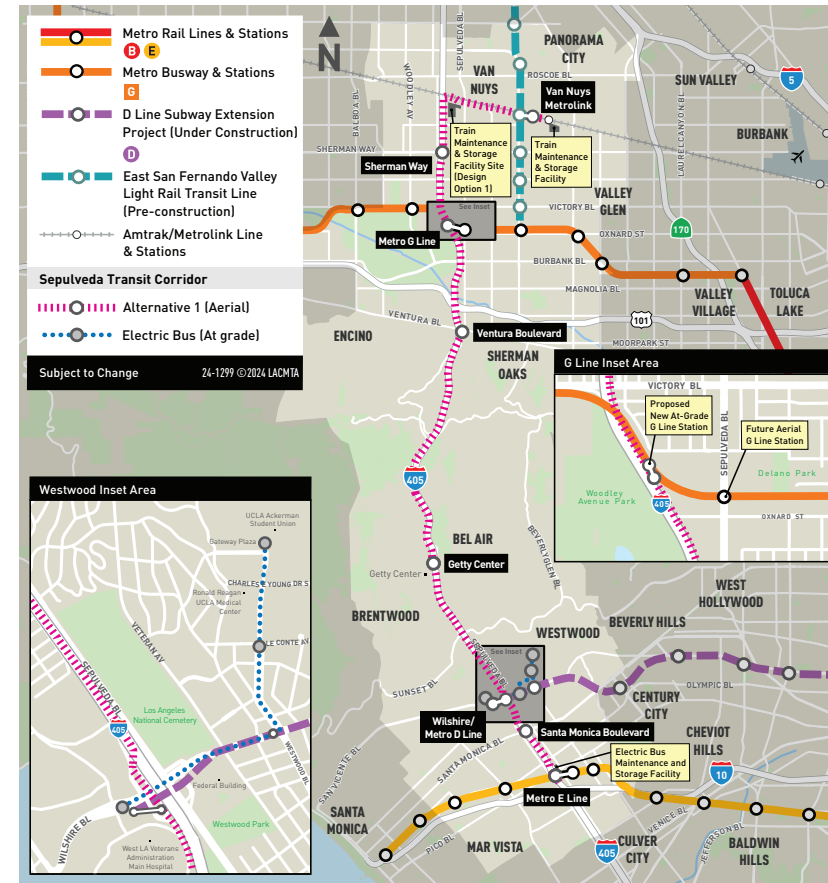

The environmental review process began in November 2021 with a public scoping period. Since then, Metro has hosted 15 in-person and online meetings that drew more than 2,300 attendees to share information about the project and gather feedback. From November 2021 through August 2024, there have been approximately 6,500 submissions received. In addition, Metro has participated in more than 50 outreach events. Metro continues to lead a robust stakeholder engagement program with the goal of building an inclusive vision that balances the unique needs of diverse corridor stakeholders.

## Project Alternatives

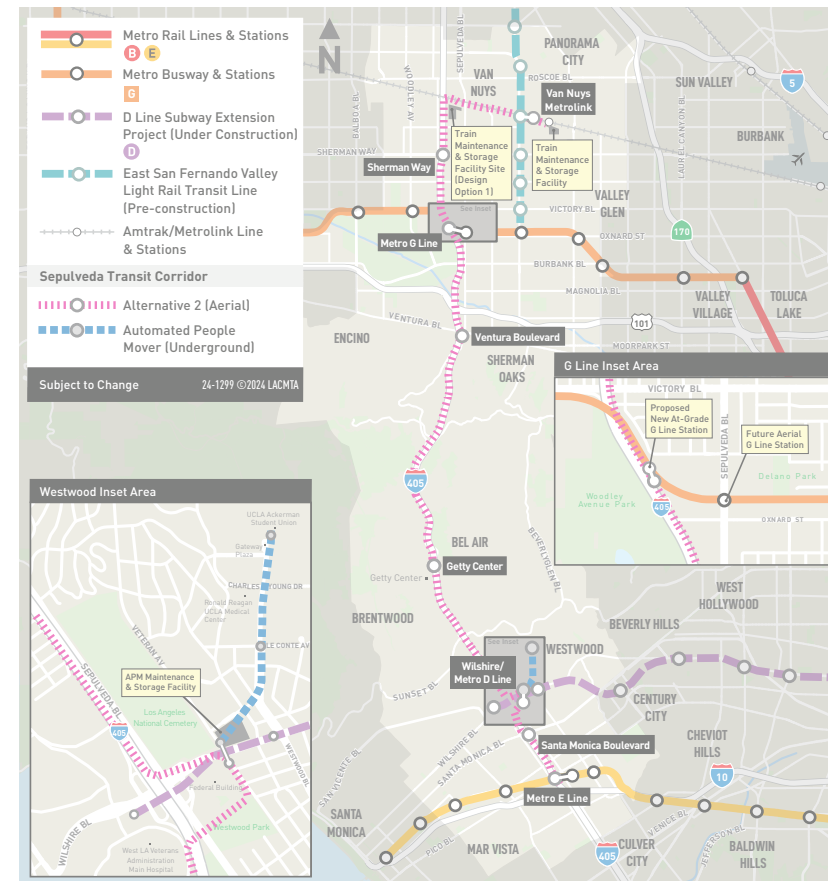

At the start of the DEIR, Metro had been evaluating six alternatives for the Project. As of October 2023, LA SkyRail Express requested the removal of Alternative 2 from further consideration in the environmental process. Metro concurred with this request in July 2024. As the environmental analysis continues, the remaining alternatives will retain their existing numbering (Alternatives 1, 3, 4, 5 and 6).

Metro is now studying five “build” alternatives, as well as the required “No-Project/No-Build” alternative, to evaluate how well each meets the project’s objectives.

### ALTERNATIVE 1

### ALTERNATIVE 2

**MODE**  
Automated monorail

**ALIGNMENT**  
Aerial

**LENGTH (MILES)**  
15.3

**# OF STATIONS**  
8

**SOUTHERN TERMINUS**  
Expo/Sepulveda

**UCLA CONNECTION**  
Electric bus

**MAINTENANCE AND STORAGE FACILITY OPTIONS**
