TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Dear Mr. Nickoloff:

Domenich Basso Incorporated
1201 North Broadway
Los Angeles, California

The Fire Department has reviewed the Site Assessment dated September 17, 2001, as submitted by Frey Environmental, Incorporated.

Based on the information provided to date, this Department has determined that no further action is required at this time.

Please note that this correspondence does not exempt you of any liability under the California Health and Safety Code or Water Code for past, present or future operations at this site. Additionally, you maintain the responsibility to correct additional or previously unidentified conditions at the site which cause, or thereafter to cause, pollution or nuisance, or otherwise pose a threat to water quality or public health.

If you require additional information, please contact Inspector Braxton Clark, of the Environmental Unit, at (213) 485-7543

Very truly yours,

WILLIAM R. BAMATTRE
Fire Chief

AN EQUAL EMPLOYMENT OPPORTUNITY - AFFIRMATIVE ACTION EMPLOYER

Appendix D ASTM-1527 User Questionnaire

ASTM 1527-13
USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)*[1] offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *"Brownfields Amendments"*),[2] the *user* must conduct the following inquires. These inquires must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquires*" is not complete.

1. **Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).**

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? Yes.

2. **Activity and land use limitations that are in place on the property or that have been filed or recorded against the property (40 CFR 312.26).**

Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded against the property under federal, tribal, state or local law? Yes.

3. **Specialized knowledge or experience of the person seeking to quality for the LLP (40 CFR 312.28).**

Do you have specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Unknown.

4. **Relationship of the purchase price to the fair market value of the *property* if it were not contaminated (40 CFR 312.29).**

Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? N/A.

5. Commonly known or reasonably ascertainable information about the *property* (40 DFR 312.30).
Are you aware of commonly known or *reasonable ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example,

a) Do you know the past uses of the *property*? Yes, for certain properties in the Project area. Known information provided to or discussed with AECOM.
b) Do you know of specific chemicals that are present or once were present at the *property*? Known information provided to or discussed with AECOM.
c) Do you know of spills or other chemical releases that have taken place at the *property*? Known information provided to or discussed with AECOM.
d) Do you know of any environmental cleanups that have taken place at the *property*? Known information provided to or discussed with AECOM.

6. **The degree of obviousness of the presence or likely presence of contamination at the *property*, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? Unknown.

Project Address: _____ Project City: **Los Angeles** Project State: **CA**

Completed by: **John C. Heintz** Company Name: Latham & Watkins Date: **08/04/21**

[1] *Landowner Liability Protections*, or *LLP's*, is the term used to describe the three types of potential defenses to Superfund liability in EPA's *Interim Guidance Regarding Criteria Landowners Must Meet in Order to Qualify for Bona Fide Prospective Purchaser, Contiguous Property Owner, or Innocent Landowner Limitations on CERCLA Liability ("Common Elements"* Guide) issued on March 6, 2003.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

COLLEGE STATION (Continued) **S121451528**

Name: COLLEGE STATION
Address: 900 NORTH SPRING STREET
City,State,Zip: LOS ANGELES, CA 90012
Site ID: 529566
CERS ID: 860153
CERS Description: Construction Storm Water

Violations:
Site ID: 529566
Site Name: College Station
Violation Date: 01-27-2020
Citation: 2009-0009-DWQ - Construction General Permit
Violation Description: SW - Late Report
Violation Notes: No annual report has been submitted for the Site since obtaining permit coverage in 2017.
Violation Division: Water Boards
Violation Program: CONSTW
Violation Source: SMARTS,

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-27-2020
Violations Found: Yes
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: On January 27, 2020, a compliance inspection was conducted onsite by Lesley Walther, Regional Board Staff (Staff). At the site, it was determined that the project had not commenced and that no ground disturbance had taken place on the project. No annual report has been submitted for the Site since obtaining permit coverage in 2017. Staff contacted the listed site contact in SMARTS, Tom Tschudin, via email on January 30, 2020 requesting that the past due annual reports be submitted. If no construction is anticipated to occur, Staff requested that a Notice of Termination (NOT) be submitted for the Site. Staff contacted Mr. Tschudin again on March 3, 2020, but there has been no response.
Eval Division: Water Boards
Eval Program: CONSTW
Eval Source: SMARTS,

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-21-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: A full compliance inspection was conducted on-site by Regional Board Staff. However, Staff determined the project had not commenced and no ground disturbance had taken place on the project.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Description: Failure to comply with one or more of the following overfill

HAWK II ENVIRONMENTAL CORPORATION (Continued) **S113101536**

prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 01/09/2020. OBSERVATION: Owner/Operator did not operate UST system to prevent spills and/or overfills. Flappers for T2 91 & T3 had previously failed overfill testing. CORRECTED ON SITE: facility had replaced their T2 91 & T 3 87 flappers after permit was issued under permit Record ID SR0033560. Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 02/08/2021. OBSERVATION: Facility did not comply with one or more of the following DO inspection requirements: DO noted incorrect ICC exp date on 7/20-1/21 DO reports, DO noted 6/18/2022 as Exp date. DO did not include date on alarm print out on 2/20, 4/20, 5/20, 8/20, 10/20, 12/20, 1/21 DO reports. DO noted incorrect date of DO inspection for 6/23/2020 DO inspection as alarm print states 6/22/2020. DO noted fuel alarms for 10/12/2020 on back page of DO report from 10/15/2020. DO should note this in Section 3 if not attaching an alarm log or work order. DO incorrectly noted N/A in last 2 check boxes in Section 8 for 7/20 & 10/20 DO reports, facility had fuel alarms on 7/9 & 10/12 respectively. CORRECTIVE ACTION: Have DO correct Exp date to 6/19/2022 per ICC website on DO reports noted above. Ensure DO is including date on alarm print outs. Ensure DO is noting correct DO inspection date on the DO reports, correct 6/23/2020 to 6/22/2020 per alarm print out. Ensure DO notes fuel alarm on [Truncated]

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name:	BLUE LINE PARCEL PA-018
Address:	924 N SPRING ST
City,State,Zip:	LOS ANGELES, CA
Region:	STATE
Facility Status:	**Completed - Case Closed**
Status Date:	02/20/2003
Global Id:	SL204BK2355
Lead Agency:	LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number:	Not reported
Latitude:	34.078265
Longitude:	-118.265419
Case Type:	Cleanup Program Site
Case Worker:	DY
Local Agency:	Not reported
RB Case Number:	0904B
File Location:	Regional Board
Potential Media Affected:	Aquifer used for drinking water supply, Soil, Soil Vapor
Potential Contaminants of Concern:	Not reported
Site History:	Parcel PA-018 is located at the intersection of North Spring Street and College Street in the City of Los Angeles, and across the street from the Metro Chinatown Station. The Site was previously owned by Union Pacific Railroad Company and at present is owned by the Los Angeles to Pasadena Metro Blue Line Construction Authority (Authority). The Site is about 6 acres and is surrounded by industrial and commercial use land. Historically the Site has been used for a wood and coal yard, an oil warehouse, dwellings, and for small businesses. Since 1905 it was used as a rail freight yard, but it has been vacant since about 1970. Buildings at the Site were demolished in the late 1980s. A gasoline tank was removed in April 1987 with no evidence of leakage. Reports from 1989 indicate that the Site was used for the storage of tanks and shipping containers. Several water-bearing zones underlie the Site, but there are no production wells within one mile of the property. The shallow semi-perched zone is about 30 ft below ground surface, and the groundwater flow direction is in a south-southwest direction. Groundwater in the southwestern portion of the Site has been impacted by heavy-end hydrocarbons (diesel-range and total recoverable petroleum hydrocarbons). Based on regional groundwater flow and documented historic service station operations at neighboring off-site properties, the groundwater contamination appears to be from off-site sources. The Site is planned for development of a four-story building, with commercial, retail business on the lower level, and housing on the other three floors. There are no planned underground structures, green areas, or unpaved areas at the Site.

CENTERRA INTEGRATED SERVICES LLC (Continued) **S123499723**

	Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 06/01/2016. OBSERVATION: 2x55 gal antifreeze drums without hazardous waste labels. All hazardous waste containers shall be marked with the following information: 1) the words Hazardous Waste ; 2) name and address of generator; 3) hazardous properties; 4) physical state; 5) composition (contents); 6) accumulation start date. CORRECTIVE ACTION: Immediately label these containers and ensure that all hazardous waste containers are marked with all the required information.

Site Name:	Centerra Integrated Services LLC
Violation Date:	02-14-2019
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 03/20/2019. OBSERVATION: 7 x 55-gallon empty drums were observed in the fenced area next to the HM/HW storage room and 2 x 55-gallon empty drums were observed inside the HM/HW storage room. None of the drums observed were properly labeled as EMPTY along with the date they were emptied. CORRECTIVE ACTION: Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

CENTERRA INTEGRATED SERVICES LLC (Continued) **S123499723**

Violation Description: Failure to inspect hazardous waste tanks for the following, when present: 4) The construction materials of the tank at least weekly to detect corrosion or leaking of fixtures or seams. 5) The construction materials of, and the area immediately surrounding, discharge confinement structures (e.g., dikes) at least weekly to detect erosion or obvious signs of leakage (e.g., wet spots or dead vegetation).
Violation Notes: Returned to compliance on 03/20/2019. OBSERVATION: OBSERVATION: Weekly hazardous waste tank inspections for the used oil tank have not been conducted. The floor of the curbed secondary containment area around the used oil tank was observed covered with oil saturated absorbent. The secondary containment area must be kept clean at all times and spills shall be contained and cleaned up as soon as possible. CORRECTIVE ACTION: Conduct weekly inspections of the hazardous waste tank according to the requirements identified above and provide a picture of the secondary containment area once it has been cleaned up.

Violation Date:	06-10-2021
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	OBSERVATION: Facility did not comply with one or more of the following DO inspection requirements: DO noted incorrect monitor cert and spill bucket date in Section 10 on 3/21-1/21 which noted 3/27/2020. DO noted incorrect OF and SB989 date in Section 10 noted incorrect date of 12/14/2019 & 4/13/20218. Tank owner/operator did not complete Section 6 on 12/20 DO report and did not print in Section 6 on 10/20 DO report. CORRECTIVE ACTION: Have DO correct monitor cert and spill bucket date to 3/23/2020 on 3/21-1/21 DO reports. Have DO correct OF date to 12/14/20218 & SB989 date to 4/17/2018 as far back as needed if incorrect. Tank owner/operator completed Section 6 and printed name on 12/20 and 10/20 DO reports on site. Submit copy of compliant DO inspection record. OBSERVATION: The designated operator employee training for James Gilmartin was not current, last completed on 11/21/2019. CORRECTIVE ACTION: Ensure that employees have been trained by the designated operator, [Truncated]

Violation Date:	03-26-2019
Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description:	Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes:	Returned to compliance on 03/26/2019. OBSERVATION: T2 (North 87) annular VR 420 sensor had a splice outside a j-box and not in a gel pack. To put splice in gel pack or back in j-box the sensor the sensor would no longer be at the lowest point to determine a leak at the earliest opportunity. CORRECTIVE ACTION: D5 like for like permit SRLH2BHA0 issued to James Gilmartin with La County ISD. Sensor was attempted to be changed by Caesar Torres with Fuel-Tec. The new VR 420 was also too short to be at the lowest point to detect a leak at the earliest opportunity. Tester acquired a new VR 420 sensor and when he returned to the property the facility was locked up. Tester stated to Inspector Young he would be there tomorrow to install the new sensor.

Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 07/05/2019. OBSERVATION: The designated operator failed to check and note the correct test date for the Overfill prevention testing which was conducted on 12/14/2018 on the designated operator monthly inspection report from 1/2019 to 3/2019. During the monthly inspection, the designated operator shall check that all required testing and maintenance for the UST system have been completed and document the dates they were done. CORRECTIVE ACTION: Ensure that designated operator includes the correct Overfill preventing testing date on those DO reports and future DO reports. Submit for verification.

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes: Returned to compliance on 04/28/2015.
Violation Division: Los Angeles City Fire Department
Violation Program: UST
Violation Source: CERS,

Site ID: 128853
Site Name: ISD FLEET - ALAMEDA ST. GARAGE
Violation Date: 03-26-2019
Citation: 23 CCR 16 2641(h) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(h)
Violation Description: Failure to have an approved UST Monitoring Plan.
Violation Notes: Returned to compliance on 04/30/2019. OBSERVATION: Facility does not have an approved Monitoring Plan. CORRECTIVE ACTION: FORTHWITH, maintain an Approved Monitoring Plan. Facility was given a notice of violation back on 12/14/2018 during a facility inspection for their monitoring plan. The monitoring plan still has not been updated. See below for needed changes to monitoring plan. OBSERVATION: Owner/Operator did not maintain a current monitoring plan. Under overfill protection for both tanks any type listed must be tested in accordance with Title 23. in accordance with Title 23. CORRECTIVE ACTION: Ensure your overfill protection listed matches what is being used on site. OBSERVATION: Owner/Operator did not maintain a current monitoring plan. Under Vapor Recovery Primary Containment & Vapor Recovery Secondary Containment for both tanks it was left "BLANK". CORRECTIVE ACTION: Under Vapor Recovery Primary Containment & Vapor Recovery Secondary Containment it should state "FIBERGLASS".

Citation:	23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description:	Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes:	Returned to compliance on 12/14/2018. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Facility did not test overfill protection before the October 13th 2018 deadline. CORRECTED ON SITE: Overfill protection was tested on site today by Al Queiros and Caesar Torres.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
Registry ID: 110060262362

Environmental Interest/Information System:
STATE MASTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste:	Not reported

L A UNION PASSENGER TERMINAL (Continued) **S106027472**

Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date: 08/27/2013
Comments: Further action required at the Site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 09/18/2013
Comments: DTSC reviewed and approved the Soil Vapor Sampling Plan to characterize the presence and nature of VOCs, methane, and hydrogen sulfide in the vadose zone beneath the proposed building foundation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/20/2013
Comments: DTSC approved the Soil Vapor Survey Results and determined no further environmental investigation of the Sit is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 12/18/2013
Comments: DTSC concurred with the Risk Management Plan for soil, soil vapor, and groundwater for implementation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 12/18/2013
Comments: DTSC approved the HHRE. Based on the HHRE, the residual petroleum-related VOCs detected in soil vapor do not pose an unacceptable risk to future occupants in the proposed multi-level buildings.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report

BLOSSOM PLAZA (Continued) **S109691862**

VCP:
Name: BLOSSOM PLAZA
Address: 900 NORTH BROADWAY
City,State,Zip: LOS ANGELES, CA 90012
Facility ID: 60001902
Site Type: Voluntary Cleanup
Site Type Detail: Voluntary Cleanup
Site Mgmt. Req.: NONE SPECIFIED
Acres: 1.9
National Priorities List: NO
Cleanup Oversight Agencies: SMBRP
Lead Agency: SMBRP
Lead Agency Description: DTSC - Site Cleanup Program
Project Manager: Not reported
Supervisor: Javier Hinojosa
Division Branch: Cleanup Chatsworth
Site Code: 301619
Assembly: 51
Senate: 24
Special Programs Code: Voluntary Cleanup Program
Status: Certified
Status Date: 04/14/2015
Restricted Use: NO
Funding: Responsible Party
Lat/Long: 34.06425 / -118.2366
APN: 5414013012, 5414013900
Past Use: HOTEL, RETAIL, RETAIL - SERVICE STATION, UNDERGROUND STORAGE TANKS
Potential COC: 31001, 30003, 30013, 30015, 30024, 30025, 30272, 30550, 30593
Confirmed COC: 30003,30013-NO,30015,30024-NO,30025-NO,30272,30593,30550,31001-NO
Potential Description: OTH, SOIL, SV, UE
Alias Name: 5414013012
Alias Type: APN
Alias Name: 5414013900
Alias Type: APN
Alias Name: 301619
Alias Type: Project Code (Site Code)

Alias Type: Envirostor ID Number

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 08/27/2013
Comments: Further action required at the Site.

BLOSSOM PLAZA (Continued) **S109691862**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Workplan
Completed Date: 09/18/2013
Comments: DTSC reviewed and approved the Soil Vapor Sampling Plan to characterize the presence and nature of VOCs, methane, and hydrogen sulfide in the vadose zone beneath the proposed building foundation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 12/20/2013
Comments: DTSC approved the Soil Vapor Survey Results and determined no further environmental investigation of the Sit is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 12/18/2013
Comments: DTSC concurred with the Risk Management Plan for soil, soil vapor, and groundwater for implementation.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Risk Assessment Report
Completed Date: 12/18/2013
Comments: DTSC approved the HHRE. Based on the HHRE, the residual petroleum-related VOCs detected in soil vapor do not pose an unacceptable risk to future occupants in the proposed multi-level buildings.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 10/21/2014
Comments: DTSC approved final TCRA Completion Report.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Time Critical Removal Action Workplan
Completed Date: 06/30/2014
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Report
Completed Date: 04/01/2015
Comments: Approval of Final Utility Trench Results

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Technical Workplan
Completed Date: 01/06/2015
Comments: Work Plan Accepted

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported

BLOSSOM PLAZA (Continued) **S109691862**

Completed Document Type: Voluntary Cleanup Agreement Termination Notification
Completed Date: 04/01/2015
Comments: Sent to RP

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Standard Voluntary Agreement
Completed Date: 06/09/2013
Comments: DTSC and Project Proponent (Forest City Blossom, LLC) entered into a Voluntary Cleanup Agreement to review and comment on PEAE documents.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Amendment - Order/Agreement
Completed Date: 11/01/2013
Comments: VCA Amendment to amend Scope of Work and DTSC Oversight Cost Estimate

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: No Further Action Letter
Completed Date: 12/20/2013
Comments: Based on available Site data, DTSC concludes that further environmental investigation of the Site is not required.

Completed Area Name: PROJECT WIDE

Click Here:

Environmental Interest/Information System:
NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR

Violation Date:	06-02-2016
Citation:	22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description:	Failure to provide employees with hazardous waste training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility.
Violation Notes:	Returned to compliance on 10/19/2017. OBSERVATION: VIOLATIONS OBSERVED DURING THIS INSPECTION SHOWED THAT EMPLOYEES LACK OF HAZARDOUS WASTE HANDLING KNOWLEDGE. The Owner/Operator failed to properly train personnel who handle hazardous waste. All employees shall be trained within six months of assignment and take part in an annual review of the initial training received. At a minimum, the training program shall be designed to ensure that facility personnel are able to respond effectively to emergencies by familiarizing them with emergency procedures, emergency equipment, and emergency systems, including where applicable: 1) procedures for using, inspecting, repairing, and replacing facility emergency and monitoring equipment; 2) key parameters for automatic waste feed cut-off systems; 3) communications or alarm systems; 4) response to fires or explosions; 5) response to ground-water contamination incidents; and 6) shutdown of operations. The owner or operator shall maintain the following documents and [Truncated]

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Complaint came from a Robert Galbraith to the state water board (e-mail) . It was forwarded to me by Eloy Luna , Robert states there are underground tanks that were filled with cement about 20 years ago on site . I reviewed cers and found that Robert Galbraith used to work at 1033 E Alhambra as a safety / environmental person . Inspector Hamilton was at this location last year and nothing was mentioned about the underground tanks by Robert Galbraith . I spoke to robert over the phone and he states he could not say anything till now . He states the diesel tanks were filled with cement (not sure if a permit was used). no information was found on cers, attached to envision about the tanks over 100 pages Michael richlak Plant manager states no underground tanks on site, spoke to several employees about tanks 25 years ago and they stated no tanks , Spoke to frize corporation Joe mc carthy he states no tanks on site (626) 369-6088, (contractor) This complaint has [Truncated]

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Violation Date:	11-23-2020
Citation:	23 CCR 16 2641(j) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(j)
Violation Description:	Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.
Violation Notes:	Returned to compliance on 11/23/2020. OBSERVATION: Owner/Operator did not properly install, calibrate, operate and/or maintain leak detection equipment. T3 STP sump had small amount of water in the sump. Not enough to send the sensor into alarm. CORRECTED ON SITE: Water was removed by tester John Reilly during monitor cert testing. Ensure the sumps and sensors remain free of water per Veeder Root operating instructions.

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: OBSERVATION: The business failed to electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities. CORRECTIVE ACTION: Electronically submit complete and accurate chemical inventory information for all hazardous materials on site at or above reportable quantities. Add Justeq07 and fill out all information to the hazmat list, you may remove biocide and scale corrosion inhibitor as justeq07 performs both of those functions. Add location 2nd location for cooling water treatment and justeq02.

Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct

SPRINT COMMUNICATIONS (Continued) **S123581863**

	the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/16/2020. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO reports were missing CERS ID from 1/2019-10/2018. DO failed to note compliance issues in Section III for fuel alarms or alarm log was missing. DO also did not note late overfill in Section III of 11/2018 & 10/2018 DO reports. DO noted employee training was completed in Section IX. Tank owner/operator did not write in responses in Section V for every compliance issue noted by DO in Section III. Tank owner/operator did not print, sign, and date on almost every DO inspection report. CORRECTIVE ACTION: Have DO go through and write in CERS ID of 10257766 on DO reports listed. Also if no alarm log is present for responded to alarms that the compliance issues are noted in Section III. Have DO mark NO for employee training and list it in Section III. Tank owner/operator shall review Section III of every DO report and write in a proper response in Section V for compliance [Truncated]

Citation: HSC 6.7 25293 - California Health and Safety Code, Chapter 6.7, Section(s) 25293
Violation Description: Failure to maintain UST records in sufficient detail to enable the UPA to determine whether the UST systems are in compliance.
Violation Notes: Returned to compliance on 01/19/2021. OBSERVATION: Owner/Operator did not maintain UST records in sufficient detail to enable the UPA to determine if UST systems are in compliance. 2019 monitor cert and spill buckets and 2017 secondary containment testing results were not on site. CORRECTIVE ACTION: Maintain UST records in sufficient detail to enable the UPA to determine if UST systems are in compliance. 2019 test results were printed and placed on site. 2017 secondary containment test results will need to be printed and placed in the binder on site.

Violation Date: 11-26-2019
Citation: HSC 6.7 25291(b) - California Health and Safety Code, Chapter 6.7, Section(s) 25291(b)
Violation Description: Failure of the UST system to be designed and constructed with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment.
Violation Notes: Returned to compliance on 11/23/2020. OBSERVATION: Owner/Operator failed to design or construct a UST system with a monitoring system capable of detecting the entry of the hazardous substance into the secondary containment. Facility has 2 pressurized lines coming out of the generator room (location of monitoring console #2 for T2 & T3) that is covered by diamond plate and therefore not able to be visually inspected. The piping run also has no sensors and is not sloped to direct leaks to the lowest point. CORRECTIVE ACTION: Install leak sensors for section of piping coming off of the 2 generators to ensure the monitoring system is capable of detecting a leak into the secondary containment. In lieu of installing sensors, facility may install see through grates in order for piping to be visually inspected thus making it above ground piping and not underground piping. Submit verification.

SPRINT COMMUNICATIONS (Continued) **S123581863**

Violation Notes:	Returned to compliance on 03/20/2019. OBSERVATION: Complete and accurate UST Monitoring Plan information is not submitted into CERS. Information listed completely fails to list any tank monitoring equipment or describe required monitoring for type of system. CORRECTIVE ACTION: Immediately and accurately update the UST Monitoring Plan in CERS to list list all tank monitoring equipment and ensure required monitoring is listed for type of system. Submit complete and accurate UST Monitoring Plan information into CERS and maintain on site. CORRECTION: Ensure that the system is capable of continuously and immediately alerts responsible personnel of every alarm. Submit proof of same for review by the LAFD CUPA. Facility was given a notice of violation for this back on 12/7/2017 and failed to take any action to comply. Facility shall notify this inspector directly by email when all required corrections have been completed per Title 23, 2712 (f).

Violation Date: 01-07-2019
Citation: HSC 6.7 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25292(e)
Violation Description: Failure to install a line leak detector (LLD).
Violation Notes: Returned to compliance on 07/31/2019. OBSERVATION: The pressurized piping on the T2 & 3 are not equipped with an automatic Line Leak Detectors. CORRECTIVE ACTION: New federal regulations require line leak detectors on all pressurized piping including generator site. T1 is a suction system and therefor is still exempt. T2 & T3 have pressurized piping which require line leak detectors. Correct immediately by obtaining a permit from the CUPA and having a properly licensed, trained, and certified contractor install a leak detector (VR PLLD's) capable of detecting a 3 gph leak for T2 & T3. **********SECOND NOTICE**********

Eval Notes: LAFD Inspector Christopher Young on site this date 11/23/2020 to conduct routine inspection of underground storage tank facility. Monitoring System components were observed and verified this date. Consent to enter, inspect and take photographs was given on this date by Jason Willis, Facilities Manager. Monitoring system certification was conducted at this time. Monitoring certification was performed by John Reilly with Reilly Plumbing & Fuel. Monitoring System components were observed and verified on this date. Tester provided the following certifications: John Reilly ICC: 9237391 Exp: 6/25/2021 VR: A29572 Exp: 2/5/2022 VMI: N/A - FTA : FIELD TEST APPARATUS APPROVED BY RED JACKET & WATER BOARD. The UST monitoring panel for T1 showed alarm for L1 remote fill. The UST monitoring panel #2 for T2-3 showed alarms for L11 trench sensors. The monitoring set up and alarm history were provided for review. The sumps and UDCs were opened for inspection and

Eval Notes:	Inspector Young onsite for NOV follow up on site to ensure water was cleared out of the sumps which was discovered during facility inspection on 12/7/2018. Inspector Young was suppose to meet with tester John Reilly today. Tester John Reilly emailed Inspector Young while Inspector Young was waiting for tester to show up saying he had been there yesterday and removed the water. Inspector Young went and checked monitoring console and the fuel alarms caused by the water were clear. The only warning was T2 delivery needed.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	900 N Alameda St Inspector Young was on site to witness moving of vent piping on site. Access to entry the property was given by Tim Balch with Blach Petroleum who is contracted by Coresite. Blach Petroleum did not inform Inspector Young that the associated vent piping was for one of the facilities AST's and was not apart of the UST's. Inspector Young worked with Tim Balch to get in contact with FDS who had given the permit to get the proper inspector out to inspect the vent piping. Tim Balch also asked Inspector Young about a permit they pulled to install a VR 321 sensor under permit SR# 32297. Tim Balch informed Inspector Young that the initial plan was to install underground piping, but they ended up going with aboveground piping and never installed the permit. Inspector Young gave him plan check Inspector Stevens phone number so he could close that permit out.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

KIM PHUOC JEWELRY INC (Continued) **1001231305**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS HAZ WASTE:
Name: HEANG CHHUN HENG
Address: 818 N BROADWAY UN 114
City,State,Zip: LOS ANGELES, CA 90012
Site ID: 122044
CERS ID: 10259779
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 122044
Site Name: HEANG CHHUN HENG
Violation Date: 09-03-2015
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to maintain uniform hazardous waste manifest, consolidated manifest, or bills of lading copies for three years.
Violation Notes: Returned to compliance on 09/26/2016. OBSERVATION: Copies of hazardous waste disposal records for 2012-2015 were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA within 30 days from the inspection date. Provide a recycling receipt for review.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 122044
Site Name: HEANG CHHUN HENG
Violation Date: 09-03-2015
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 03/22/2016. OBSERVATION: This facility s EPA ID number is inactive. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately contact DTSC and reactivate your EPA ID number and submit evidence to the cupa by 30 days from now.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 122044
Site Name: HEANG CHHUN HENG
Violation Date: 09-03-2015
Citation: HSC 6.5 25143.9 - California Health and Safety Code, Chapter 6.5, Section(s) 25143.9
Violation Description: Failure to meet the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if

HEANG CHHUN HENG (Continued) **S123536749**

the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, marked, and placarded in accordance with the department's hazardous waste labeling, marking, and placarding requirements which are applicable to generators, except that the container or tank shall be labeled or marked clearly with the words "Excluded Recyclable Material" instead of the words "Hazardous Waste," 8) If the material is used oil, the containers, aboveground tanks, and fill pipes used to transfer oil into underground storage tanks shall also be labeled and clearly marked with the words "Used Oil", 9) The owner or operator of the business location where the material is located has a business plan that meets the following minimal requirements: emergency response plans and procedures, which specifically address the material or that meets the emergency response and contingency requirements which are applicable to generators of hazardous waste, and 10) The material shall be stored and handled in accordance with all local ordinances and codes.

Violation Notes: Returned to compliance on 09/26/2016. OBSERVATION: Generator failed to meet one of the following requirements of excluded recyclable materials: 1) Used or reused as an ingredient in an industrial process to make a product if the material is not being reclaimed, 2) Used or reused as a safe and effective substitute for commercial products if the material is not being reclaimed, 3) Returned to the original process from which the material was generated, without first being reclaimed, if the material is returned as a substitute for raw material feedstock, and the process uses raw materials as principal feedstocks, 4) The material is recycled and used at the same facility at which the material was generated, or by the same corporate entity, 5) The material is recycled within the applicable generator accumulation time, 6) The material is managed in accordance with all applicable requirements for generators of hazardous wastes, 7) If the material is held in a container or tank, the container or tank is labeled, [Truncated]

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Violations:
Site ID: 397993
Site Name: MWD - Headquarters
Violation Date: 02-20-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 04/11/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. CORRECTIVE ACTION: Maintain overfill prevention system to comply with the deficiencies noted above. Submit verification. ** Mr. Cox, your remote fill Audible/Visual alarm is currently not functioning. Please contact a licensed contractor to fix this and have this equipment tested with a LAFD CUPA Inspector on site to verify its functionality. **

Violation Date: 11-25-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 12/26/2020. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. The following wastes were observed with exceeding accumulation times: 1. 30-gallon drum used oil dated 10/27/2016 2. 30-gallon drum waste aerosol dated 11/14/2010 3. 5-gallon bucket used batteries dated 6/7/2018 CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Violation Description:	Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.
Violation Notes:	Returned to compliance on 04/21/2021. OBSERVATION: Owner/Operator did not continuously monitor the interstitial space of the USTs such that the leak detection activates an audible/visual alarm when a leak is detected. CORRECTIVE ACTION: Continuously monitor the interstitial space of the USTs such that the leak detection equipment activates an audible/visual alarm when a leak is detected. Contact the Inspector prior to changing the sensor for Like for Like permit. Submit verification.
Violation Division:	Los Angeles City Fire Department
Violation Program:	UST
Violation Source:	CERS,
Site ID:	397993
Site Name:	MWD - Headquarters
Violation Date:	02-27-2020
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 03/27/2020. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO noted wrong monitor cert date in Section X of DO reports for 3/12/2019, 7/2/2019, & 1/2020 DO reports. DO noted incorrect SB989 date in Section X on 2/5/2020 & 11/13/2019 DO reports as well as 1/2019, 2/11/2019, & 7/2/2019. DO noted wrong date for line integrity testing in Section X on 10/2019-2/2020 DO reports or didn't mark the check box YES and note the date for line integrity testing in Section X on 5/6/2019-1/2019 DO reports. Tank owner/operator did not print, sign, and date in Section VI on 2/2020, 12/2019, & 1/2019 DO reports. CORRECTIVE ACTION: Have DO note the correct date for the monitor cert of 2/20/2019 for above listed DO reports. Have the DO note the correct SB989 of 10/29/2019 for 10/29/2019-11/13/2019 DO reports & note the correct date of 10/27/2016 for 1/2019, 2/11/2019, & 7/2/2019 DO reports. Have the DO note the correct date of 9/20/2019 for the [Truncated]

Citation: HSC 6.7 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25292(e)
Violation Description: Failure to install a line leak detector (LLD).
Violation Notes: Returned to compliance on 12/16/2019. *** Mr. Cox, as discussed with Inspector Yoshihashi over the phone on 4-29-2019, the violation will be upgraded to a Class II. Inspector Yoshihashi received an email from Mr. Cox on 4-30-2019 stating that after the Contractor bids, it was awarded to Sun West Engineering for the installation of an Electronic Line Leak Detector that will activate an audible/visual alarm only due to the fact that it is an Emergency Generator. At this time, Inspector Yoshihashi will remain at a Class II violation, which is not subject to legal enforcement, unless a significant amount of time has passed where there is no start of any construction towards the final installation and testing of the line leak detector. Mr. Cox has been diligent in keeping Inspector Yoshihashi aware of the progress of MWD's continued efforts towards compliance. ***

Environmental Interest/Information System:
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description:	Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes:	Returned to compliance on 06/17/2019. "NOT ACCEPTED: Effective December 28, 2017, CalEPA has replaced the previously existing five federal hazard categories in CERS with twenty-four new federal hazard categories. The following federal hazard categories are now obsolete fire, reactive, pressure release, acute health, chronic health. A review of your submittal has determined that you still have the previous federal categories selected and/or have NOT selected any of the NEW federal hazard categories for your chemical inventory. Please review your hazardous material inventory and complete the following steps: 1) Deselect all of the five obsolete federal hazard categories for all chemical inventory listed under your facility. 2) Update your hazardous material inventory and select all applicable federal hazard categories from the 24 newly listed categories for all chemical inventory stored at your facility. You may refer to Section 2 of a current Safety Data Sheets (SDS) (previously called an MSDS) to determine [Truncated]

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: label 2 totes of used oil and tote of used coolant
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 388846
Site Name: CALIFORNIA DROP FORGE
Violation Date: 06-07-2016
Citation: 22 CCR 12 66262.20 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.20
Violation Description: Failure to prepare a Uniform Hazardous Waste Manifest and, if necessary, a Continuation Sheet, before the transport of a hazardous waste off-site for transfer, treatment, storage, or disposal.
Violation Notes: Returned to compliance on 10/10/2017. OBSERVATION: HAZARDOUS WASTE GENERATED FROM THIS ADDRESS WAS MANIFESTED OUT AS 1033 ALHAMBRA WASTE. The Owner/Operator failed to prepare hazardous waste manifests for the transport of a hazardous waste for off-site transfer, treatment, storage or disposal as required. CORRECTIVE ACTION: The Owner/Operator shall properly prepare manifests for any transport of a hazardous

CALIFORNIA DROP FORGE (Continued) **S123515164**

waste for off-site transfer, treatment, storage or disposal going forward. Provide a copy of a prepared manifest to the CUPA to verify compliance.
Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 388846
Site Name: CALIFORNIA DROP FORGE
Violation Date: 06-07-2016
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 10/03/2017. OBSERVATION: This facility does not have a valid EPA ID number to manage hazardous waste. A hazardous waste generator shall not treat, store, dispose of, transport or offer for transportation, hazardous waste without an EPA ID number. CORRECTIVE ACTION: Immediately obtain an EPA ID number through DTSC to manage hazardous waste and submit evidence to the CUPA.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Not reported
Violation Division: Los Angeles City Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 388846
Site Name: CALIFORNIA DROP FORGE
Violation Date: 06-27-2019
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 07/31/2019. OBSERVATION: Accumulation start dates of all 3 totes of "oily water" were 7/15/18. Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the

CALIFORNIA DROP FORGE (Continued) **S123515164**

conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Violation Division: Los Angeles County Fire Department
Violation Program: HW
Violation Source: CERS,

Site ID: 388846
Site Name: CALIFORNIA DROP FORGE
Violation Date: 06-07-2016
Citation: HSC 6.5 25187.6 - California Health and Safety Code, Chapter 6.5, Section(s) 25187.6
Violation Description: No person shall remove, transfer, or dispose of the hazardous waste until permission for removal, transfer, or disposal is given by an authorized agent.
Violation Notes: Returned to compliance on 10/03/2017. OBSERVATION: WASTE FINE METAL GENERATED FROM WELDING DEPARTMENT WAS ACCUMULATED/ STORED OUTSIDE THE PREMISE ON CITY PROPERTY. Owner/Operator removed, transferred, or disposed of a hazardous waste without permission for removal, transfer, or disposal is given by an authorized agent. CORRECTIVE ACTION: Owner/Operator shall immediately include or verify that the facility operational procedures/training includes and does not allow for removal, transfer or disposal of a hazardous waste without permission from a designated employee and that these authorized agents are clearly noted in the facilities operational procedures.

Violation Date: 06-23-2021
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 08/20/2021. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO noted incorrect ICC exp date on 7/20-1/21 DO reports. DO noted date of 6/18/2022. DO did not include date on alarm print out on 4/21, 1/21, 12/20, 10/20, & 7/20 DO reports. CORRECTIVE ACTION: Have DO note correct date for ICC exp date of 6/19/2022 on DO reports from 7/20-1/21. Ensure DO is including date on alarm print out that is

CHINA TOWN GAS AMERICA (Continued) **U001560538**

attached to DO reports. Submit copy of compliant DO inspection record.

Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 07/24/2019. OBSERVATION UST tank information is not current in CERS. In tank description under DATE UST SYSTEM INSTALLED for both tanks it states "1/1/1900". CORRECTIVE ACTION: In tank description under DATE UST SYSTEM for both tanks it should state sometime after "11/20/1998". Inspector looked through archive records and determined permit to install tanks was around 11/20/1998. OBSERVATION: Facility does not have an approved operating permit application. In Vent, Vapor Recovery (VR) and Riser / Fill Pipe Piping Construction under VENT SECONDARY CONTAINMENT for both tanks it states "NONE". CORRECTIVE ACTION: In Vent, Vapor Recovery (VR) and Riser / Fill Pipe Piping Construction under VENT SECONDARY CONTAINMENT for both tanks it should state "FIBERGLASS. OBSERVATION: Facility does not have an approved operating permit application. In Vent, Vapor Recovery (VR) and Riser / Fill Pipe Piping Construction under VAPOR SECONDARY containment for both tanks it states "NONE". CORRECTIVE [Truncated]

CHINA TOWN GAS AMERICA (Continued) **U001560538**

Violation Date:	06-17-2020
Citation:	23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description:	For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes:	Returned to compliance on 08/20/2020. OBSERVATION: Facility did not comply with one or more of the following DO monthly inspection requirements: DO did not include the date and time on alarm print out for 5/2/2020-10/2019 & 7/2019-6/2019 DO reports. CORRECTIVE ACTION: Ensure that DO is including date and time on alarm print outs. Submit copy of compliant DO inspection record.

Violation Date:	06-23-2021
Citation:	23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)
Violation Description:	Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.
Violation Notes:	Returned to compliance on 06/23/2021. OBSERVATION: The T1 87 fill sump sensor was raised approximately 1 inch off the lowest point of the sump and not located to detect a leak at the earliest opportunity. Monitoring equipment shall be maintained to be able to detect a leak at the earliest possible opportunity. Sensor was sitting on top of a tipped over sensor sleeve. CORRECTED ON SITE: Sensor was immediately relocated the sensor to the lowest point of the T1 87 fill sump by tester Peyman Nasibi with Pacific Nozzle. This is a warning for the facility, if the facility is caught with raised sensors going forward the violation will be a Class I and will be sent to my legal unit for fine assessment.

Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200

CHINA TOWN GAS AMERICA (Continued) **U001560538**

miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/22/2020. OBSERVATION: Owner/Operator is a small quantity generator and failed to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles), or has failed to comply with the conditions of CCR 66262.34(d) and has stored hazardous waste over 90 days. CORRECTIVE ACTION: Dispose of hazardous waste that has been stored over the applicable time limit and provide documentation that the violation has been corrected.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 06/27/2019. OBSERVATION: Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Facility did not test overfill protection before the October 1st 2018 deadline. Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
