I-405 Sepulveda Pass ExpressLanes
Project

Dear Honorable Laura Friedman:

This is to advise you that the Los Angeles County Metropolitan Transportation Authority (Metro), in cooperation with Caltrans as the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) lead agency, is formally initiating studies for improvements to Interstate 405, between US-101 and I-10, in Los Angeles County.

The purpose of the I-405 Sepulveda Pass ExpressLanes Project is to reduce congestion and improve the overall movement of people and goods on I-405. The project is needed to address traffic congestion and related deficiencies on I-405 between US-101 and I-10 (Sepulveda Pass). This will be accomplished by improving the utilization of freeway capacity while addressing impacts to the environment and surrounding communities, including historically disadvantaged communities, within the project area.

Preliminary environmental resources studies indicate that an Environmental Impact Report/Environmental Impact Statement (EIR/EIS) is the appropriate environmental document. Caltrans will prepare an EIR/EIS to evaluate the anticipated environmental effects and recommend measures to mitigate those effects pursuant to CEQA and NEPA.

During the course of the study, Caltrans will work closely with the public to assure that all pertinent factors and viable alternatives are considered. We welcome any comments or suggestions you may have concerning possible alternatives or potential social, economic, and environmental impacts as they pertain to the proposed project.

Three virtual scoping meetings will be held to provide you an opportunity to obtain first-hand project information and to express your comments and concerns about the proposed project. The virtual public scoping meetings are scheduled for the following dates:

- Saturday, August 14, 2021, 10 a.m. – 12 p.m.
- Tuesday, August 17, 2021, 6 – 8 p.m.
- Wednesday, August 18, 2021, 11:30 a.m. – 1:30 p.m.

Dear Honorable Jesse Gabriel:

This is to advise you that the Los Angeles County Metropolitan Transportation Authority (Metro), in cooperation with Caltrans as the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) lead agency, is formally initiating studies for improvements to Interstate 405, between US-101 and I-10, in Los Angeles County.

The purpose of the I-405 Sepulveda Pass ExpressLanes Project is to reduce congestion and improve the overall movement of people and goods on I-405. The project is needed to address traffic congestion and related deficiencies on I-405 between US-101 and I-10 (Sepulveda Pass). This will be accomplished by improving the utilization of freeway capacity while addressing impacts to the environment and surrounding communities, including historically disadvantaged communities, within the project area.

Preliminary environmental resources studies indicate that an Environmental Impact Report/Environmental Impact Statement (EIR/EIS) is the appropriate environmental document. Caltrans will prepare an EIR/EIS to evaluate the anticipated environmental effects and recommend measures to mitigate those effects pursuant to CEQA and NEPA.

During the course of the study, Caltrans will work closely with the public to assure that all pertinent factors and viable alternatives are considered. We welcome any comments or suggestions you may have concerning possible alternatives or potential social, economic, and environmental impacts as they pertain to the proposed project.

Three virtual scoping meetings will be held to provide you an opportunity to obtain first-hand project information and to express your comments and concerns about the proposed project. The virtual public scoping meetings are scheduled for the following dates:

- Saturday, August 14, 2021, 10 a.m. – 12 p.m.
- Tuesday, August 17, 2021, 6 – 8 p.m.
- Wednesday, August 18, 2021, 11:30 a.m. – 1:30 p.m.

The Honorable Jesse Gabriel

I-405 Sepulveda Pass ExpressLanes
Project

Dear Honorable Holly Mitchell:

This is to advise you that the Los Angeles County Metropolitan Transportation Authority (Metro), in cooperation with Caltrans as the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) lead agency, is formally initiating studies for improvements to Interstate 405, between US-101 and I-10, in Los Angeles County.

The purpose of the I-405 Sepulveda Pass ExpressLanes Project is to reduce congestion and improve the overall movement of people and goods on I-405. The project is needed to address traffic congestion and related deficiencies on I-405 between US-101 and I-10 (Sepulveda Pass). This will be accomplished by improving the utilization of freeway capacity while addressing impacts to the environment and surrounding communities, including historically disadvantaged communities, within the project area.

Preliminary environmental resources studies indicate that an Environmental Impact Report/ Environmental Impact Statement (EIR/EIS) is the appropriate environmental document. Caltrans will prepare an EIR/EIS to evaluate the anticipated environmental effects and recommend measures to mitigate those effects pursuant to CEQA and NEPA.

During the course of the study, Caltrans will work closely with the public to assure that all pertinent factors and viable alternatives are considered. We welcome any comments or suggestions you may have concerning possible alternatives or potential social, economic, and environmental impacts as they pertain to the proposed project.

Three virtual scoping meetings will be held to provide you an opportunity to obtain first-hand project information and to express your comments and concerns about the proposed project. The virtual public scoping meetings are scheduled for the following dates:

I-405 Sepulveda Pass ExpressLanes
Project

Dear Honorable Mike Bonin:

This is to advise you that the Los Angeles County Metropolitan Transportation Authority (Metro), in cooperation with Caltrans as the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) lead agency, is formally initiating studies for improvements to Interstate 405, between US-101 and I-10, in Los Angeles County.

The purpose of the I-405 Sepulveda Pass ExpressLanes Project is to reduce congestion and improve the overall movement of people and goods on I-405. The project is needed to address traffic congestion and related deficiencies on I-405 between US-101 and I-10 (Sepulveda Pass). This will be accomplished by improving the utilization of freeway capacity while addressing impacts to the environment and surrounding communities, including historically disadvantaged communities, within the project area.

Preliminary environmental resources studies indicate that an Environmental Impact Report/Environmental Impact Statement (EIR/EIS) is the appropriate environmental document. Caltrans will prepare an EIR/EIS to evaluate the anticipated environmental effects and recommend measures to mitigate those effects pursuant to CEQA and NEPA.

During the course of the study, Caltrans will work closely with the public to assure that all pertinent factors and viable alternatives are considered. We welcome any comments or suggestions you may have concerning possible alternatives or potential social, economic, and environmental impacts as they pertain to the proposed project.

Three virtual scoping meetings will be held to provide you an opportunity to obtain first-hand project information and to express your comments and concerns about the proposed project. The virtual public scoping meetings are scheduled for the following dates:

- Saturday, August 14, 2021, 10 a.m. – 12 p.m.
- Tuesday, August 17, 2021, 6 – 8 p.m.
- Wednesday, August 18, 2021, 11:30 a.m. – 1:30 p.m.

I-405 Sepulveda Pass ExpressLanes
Project

Notice of Scoping/Initiation of Studies

This is to advise you that Metro, in cooperation with Caltrans as the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) lead agency, is formally initiating studies for improvements to I-405 in Los Angeles County between US-101 and I-10.

The purpose of the I-405 Sepulveda Pass ExpressLanes project is to reduce congestion and improve the overall movement of people and goods on I-405. The project is needed to address traffic congestion and related deficiencies on I-405 between US-101 and I-10 (Sepulveda Pass). This will be accomplished by improving the utilization of freeway capacity while addressing impacts to the environment and surrounding communities, including historically disadvantaged communities, within the project area.

Preliminary environmental resources studies indicate that an Environmental Impact Report/Environmental Impact Statement (EIR/EIS) is the appropriate environmental document. Caltrans will prepare an EIR/EIS to evaluate the anticipated environmental effects and recommend measures to mitigate those effects pursuant to CEQA and NEPA.

During the course of the study, Caltrans will work closely with the public to assure that all pertinent factors and viable alternatives are considered. We welcome any comments or suggestions you may have concerning possible alternatives or potential social, economic, and environmental impacts as they pertain to the proposed project.

Three virtual scoping meetings will be held to provide you an opportunity to obtain first-hand project information and to express your comments and

July 30, 2021
Page 2

concerns about the proposed project. The virtual scoping meetings are scheduled for the following dates:

- Saturday, August 14, 2021, 10 a.m. - 12 p.m.
- Tuesday, August 17, 2021, 6 - 8 p.m.
- Wednesday, August 18, 2021, 11:30 a.m. - 1:30 p.m.

The link to the virtual scoping meeting location as well as preliminary scoping materials are available at the following website:
www.metro.net/405expresslanes

All comments received will become part of the project record and will provide valuable input to our environmental and design personnel. Scoping comments must be submitted by **September 1, 2021**.

Comments can be submitted via regular mail, email, online via comment form, or by phone.

Mail comments to:

Ronald Kosinski
Caltrans District 7, Division of Environmental Planning
100 S. Main St., MS 16A
Los Angeles, CA 90012

Email comments to: 405expresslanes@metro.net

Submit comments online at: www.metro.net/405expresslanes

Submit comments by phone at: (213) 922-4860

If you have any questions, please contact Karl Price, Senior Environmental Planner, at (213) 266-3822, or Karl.Price@dot.ca.gov. Thank you for your interest in this important transportation study.

Sincerely,

RONALD KOSINSKI
Deputy District Director
Division of Environmental Planning
Caltrans, District 7

Proyecto I-405 Sepulveda Pass
ExpressLanes

Aviso de evaluación del alcance/inicio de los estudios

Por la presente le informamos que Metro, en cooperación con Caltrans como organismo principal en virtud de la Ley de Calidad Ambiental de California (CEQA) y la Ley Nacional de Política Ambiental (NEPA), está iniciando formalmente los estudios para mejorar la I-405 en el condado de Los Angeles entre la US-101 y la I-10.

El objetivo del proyecto I-405 Sepulveda Pass ExpressLanes es reducir la congestión y mejorar el movimiento general de personas y mercancías en la I-405. El proyecto es necesario para abordar la congestión del tráfico y las deficiencias asociadas en la I-405 entre la US-101 y la I-10 (Sepulveda Pass). Para ello se mejorará la capacidad útil de la autopista al tiempo que se abordan los impactos en el medio ambiente y las comunidades circundantes, incluidas las comunidades históricamente desfavorecidas, dentro del área del proyecto.

Los estudios preliminares sobre recursos ambientales indican que un Reporte de Impacto Ambiental/Declaración de Impacto Ambiental (EIR/EIS) es el documento ambiental apropiado. Caltrans preparará un EIR/EIS para evaluar los efectos ambientales previstos y recomendará medidas para mitigar esos efectos de conformidad con la CEQA y la NEPA.

Durante el transcurso del estudio, Caltrans trabajará en estrecha colaboración con el público para garantizar que se consideren todos los factores pertinentes y alternativas viables. Agradecemos cualquier comentario o sugerencia que pueda tener sobre posibles alternativas o posibles impactos sociales, económicos y ambientales relacionados con el proyecto propuesto.

30 de julio de 2021
Página 2

Se llevarán a cabo tres reuniones virtuales de alcance público que le brindarán la oportunidad de obtener información de primera mano y expresar sus comentarios e inquietudes sobre el proyecto propuesto. Las reuniones virtuales de alcance público están programadas para las siguientes fechas:

- Sábado, 14 de agosto de 2021, 10 a.m. - 12 p.m.
- Martes, 17 de agosto de 2021, 6 - 8 p.m.
- Miércoles, 18 de agosto de 2021, 11:30 a.m. - 1:30 p.m.

El enlace a la ubicación virtual de la reunión para evaluar el alcance y los materiales preliminares están disponibles en el siguiente sitio web:
www.metro.net/405expresslanes

Todos los comentarios recibidos formarán parte del registro del proyecto y proporcionarán información valiosa a nuestro personal ambiental y de diseño. Los comentarios del estudio para evaluar el alcance deben enviarse antes del **1 de septiembre de 2021**.

Los comentarios pueden enviarse por correo postal, correo electrónico, por el sitio web a través del formulario de comentarios o por teléfono.

Envíe los comentarios por correo a:

Ronald Kosinski
Caltrans District 7, Division of Environmental Planning
100 S. Main St., MS 16A
Los Ángeles, CA 90012

Envíe sus comentarios por correo electrónico a: 405expresslanes@metro.net

Envíe sus comentarios por el sitio web en: www.metro.net/405expresslanes

Déjenos sus comentarios por teléfono al: (213) 922-4860

Si tiene alguna pregunta, contacte a Karl Price, Senior Environmental Planner, en el número (213) 266-3822 o en la dirección Karl.Price@dot.ca.gov. Gracias por su interés en este importante estudio sobre transporte.

Atentamente,

RONALD KOSINSKI
Director Adjunto del Distrito
División de Planificación Ambiental
Caltrans, Distrito 7

Notice of Preparation

Notice of Preparation

To: _____ From: _____

(Address) (Address)

Subject: Notice of Preparation of a Draft Environmental Impact Report

_____ will be the Lead Agency and will prepare an environmental impact report for the project identified below. We need to know the views of your agency as to the scope and content of the environmental information which is germane to your agency's statutory responsibilities in connection with the proposed project. Your agency will need to use the EIR prepared by our agency when considering your permit or other approval for the project.

The project description, location, and the potential environmental effects are contained in the attached materials. A copy of the Initial Study (is is not) attached.

Due to the time limits mandated by State law, your response must be sent at the earliest possible date but not later than 30 days after receipt of this notice.

Please send your response to _____ at the address shown above. We will need the name for a contact person in your agency.

Project Title: _____

Project Applicant, if any: _____

Date _____ Signature Karl Price
Title _____
Telephone _____

Reference: California Code of Regulations, Title 14, (CEQA Guidelines) Sections 15082(a), 15103, 15375.

PROJECT DESCRIPTION

The Los Angeles County Metropolitan Transportation Authority (Metro), in cooperation with the California Department of Transportation (Caltrans) District 7 as the lead agency under the California Environmental Quality Act (CEQA) and the National Environmental Policy Act (NEPA), propose to improve traffic conditions on Interstate 405 (I-405) starting in the south at Interstate 10 (I-10) and terminating in the north at U.S. Highway 101 (US-101) in Los Angeles County. The proposed project intends to reduce congestion, encourage carpooling and transit, improve trip reliability, reduce degradation of the carpool and general-purpose lanes, increase person throughput, and apply technology to help manage traffic.

Caltrans will prepare an Environmental Impact Report (EIR) for the proposed project which would construct improvements that may include, but not be limited to, the conversion of the existing high-occupancy vehicle (HOV) lane into a high-occupancy toll (HOT), or ExpressLane, in each direction, or the conversion of the existing HOV lane to an ExpressLane and also adding a second ExpressLane in each direction. The purpose and objective of the proposed project is to improve the utilization of freeway capacity while addressing impacts to the environment and surrounding communities, including historically disadvantaged communities, within the project area.

Caltrans will be the lead agency for the Proposed Project under CEQA and NEPA as assigned by the Federal Highway Administration (FHWA).

LOCATION OF STUDY AREA

The Study Area includes portions of the cities of Santa Monica, Los Angeles, Culver City, and unincorporated areas in Los Angeles County, as indicated on the figure below.

ALTERNATIVES

The alternatives currently under consideration are described below.

Alternative 1 (No Build):

The No Build Alternative does not include improvements to the existing lanes along I-405 between I-10 and US-101.

Alternative 2: Convert Existing HOV Lane to One ExpressLane (Standard Lane and Shoulder Widths)

This build alternative would convert the existing HOV lane in each direction, along I-405 between I-10 and US-101, to an ExpressLane. The northbound and southbound directions of the freeway would be restriped within the existing footprint to accommodate one 12-foot wide ExpressLane with a 4-foot wide buffer separating the ExpressLane from the 12-foot wide general-purpose lanes. Dynamic pricing would be deployed in the ExpressLane to ensure trip reliability and traffic flow. Installation of toll and communication infrastructure and modification/installation of overhead signs is required. Alternative 2 proposes to widen the freeway, where necessary, to accommodate an additional

weave lane at ExpressLane ingress/egress locations and maintain stopping sight distance at curves. Non-standard inside shoulders would be maintained in a few locations where constraints exist, and standard 10-foot outside shoulders would be provided where possible. Retaining walls will be provided where required to minimize and avoid right-of-way (ROW) acquisition.

Other improvements include construction of retaining walls and sound walls, utility improvements, and drainage improvements.

Alternative 3: Convert Existing HOV Lane to Two ExpressLanes (Non-Standard Lane and Shoulder Widths)

This build alternative would convert the existing HOV lane to an ExpressLane and add a second ExpressLane in each direction between I-10 and US-101. The freeway would be widened and restriped to accommodate the two ExpressLanes with a buffer separating the ExpressLanes from the general-purpose lanes. Dynamic pricing would be deployed in the ExpressLanes to ensure trip reliability and traffic flow. Installation of toll and communication infrastructure and modification/installation of overhead signs would be required. Alternative 3 proposes to widen the freeway to the outside in order to accommodate the proposed two-lane ExpressLane facility as described. Non-standard lanes and shoulders would be provided to accommodate for the addition of the new ExpressLanes as part of Alternative 3. Retaining walls would be provided where required to minimize and avoid ROW acquisition. The reduction of shoulder and lane widths allows for accommodation of the proposed two-lane ExpressLane facility without significant proposed roadway widening. However, in locations with the following conditions, additional roadway widening may be required:

- 12-foot wide weaving lane at ExpressLane ingress/egress locations
- Widening of inside/outside shoulders to maintain sight distance

Other improvements include construction of retaining walls and sound walls, utility improvements, and drainage improvements.

Alternative 4: Convert Existing HOV Lane to Two ExpressLanes (Standard Lanes and Shoulder Widths)

This build alternative would convert the existing HOV lane, between I-10 and US-101, to an ExpressLane in each direction, and a second ExpressLane in each direction would also be added, while providing standard lane widths, shoulder widths and stopping sight distances. The freeway would be widened and restriped to accommodate the two ExpressLanes with a buffer separating the ExpressLanes from the general-purpose lanes. Dynamic pricing would be deployed in the ExpressLanes to ensure trip reliability and traffic flow. Installation of toll and communication infrastructure and modification/installation of overhead signs would be required. Alternative 4 proposes to widen the freeway to the outside in order to accommodate the proposed standard two-lane ExpressLane facility as described. Retaining walls would be provided where required to minimize and avoid ROW acquisition. Reconstruction of some existing freeway structures would be required to implement Alternative 4's standard roadway cross-section.

Other improvements include construction of retaining walls and sound walls, utility improvements, and drainage improvements.

Alternative 5: Add an Additional HOV Lane (Non-standard Lane and Shoulder Widths)

This build alternative would add an additional HOV lane, between I-10 and US-101, in each direction. The freeway would be widened and restriped to accommodate the two HOV lanes with a buffer separating the HOV lanes from the general-purpose lanes. Alternative 5 proposes to widen the freeway to the outside in order to accommodate the proposed two-lane HOV facility as described. Non-standard lanes and shoulders would be provided in order to accommodate for the addition of the new HOV lane as part of Alternative 5. Retaining walls would be provided where required to minimize and avoid ROW acquisition. The reduction of shoulder and lane widths allows for accommodation of the proposed two-lane HOV facility without significant proposed roadway widening. However, in locations with the following conditions, additional roadway widening may be required:

- 12-foot wide weaving lane at HOV ingress/egress locations
- Widening of inside/outside shoulder to maintain sight distance

Other improvements include construction of retaining walls and sound walls, utility improvements, and drainage improvements.

POTENTIAL ENVIRONMENTAL EFFECTS:

Various environmental and community resources are known to exist within the limits of the study area and will be studied in the EIR. Environmental effects anticipated for study include, but are not limited to: Land Use, Growth, Community Impacts, Utilities and Emergency Services, Traffic and Transportation/Pedestrian and Bicycle Facilities, Visual/Aesthetics, Cultural Resources/Tribal Cultural Resources, Water Quality and Stormwater Runoff, Hydrology and Floodplains, Geology/Soils/Seismicity/Topography, Paleontology, Hazardous Waste/Materials, Air Quality/Greenhouse Gas Emissions/Climate Change, Noise, Wildfire, Energy, Biological Environment, and Cumulative Impacts.

PUBLIC SCOPING MEETINGS:

The formal scoping period will begin on August 3, 2021 and will close on September 1, 2021. Metro and Caltrans will be holding virtual public scoping meetings to provide an overview of the project, summary of the environmental process and issues addressed, and receive input regarding environmental issues and the suggested scope and content of the EIR. The virtual scoping meetings will be held on:

- Saturday, August 14, 2021, 10 a.m. – 12 p.m.;
- Tuesday, August 17, 2021, 6 – 8 p.m.;

- Wednesday, August 18, 2021, 11:30 a.m. – 1:30 p.m.

The link to the virtual public scoping meetings, as well as further information, can be found on the project website at www.metro.net/405expresslanes. Scoping comments can be submitted via regular mail, email, online via comment form, or by phone. Mail comments to: Ronald Kosinski, Caltrans District 7, Division of Environmental Planning, 100 S. Main St., MS 16A, Los Angeles, CA 90012. Email comments to 405expresslanes@metro.net. Submit comments online at www.metro.net/405expresslanes. Submit comments via phone at (213) 922-4860. Scoping comments must be submitted by September 1, 2021.
