SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

The Map ID column refers to the Map ID-Focus Map(s) of the listed site.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/29/2008 has revealed that there is 1 NPL site within the searched area.

Site	Address	Map ID
PEMACO INCORPORATED	***5050 EAST SLAUSON AVENU***	***24-2,5***

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/07/2008 has revealed that there are 5 CERCLIS sites within the searched area.

Site	Address	Map ID
OMS #6	***5300 BANDINI BOULEVARD***	***2-2***
PEMACO INCORPORATED	***5050 EAST SLAUSON AVENU***	***24-2,5***

EXECUTIVE SUMMARY

Site	Address	Map ID
PARK AVENUE ELEMENTARY SCHOOL/	***5310 ELIZABETH ST***	***86-8***
VLOEDMAN DUMP	***5240 EAST SANTA ANA ST***	***89-8***
RHONE POULENC BASIC CHEMICALS	***4570 ARDINE STREET***	***92-7***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/03/2007 has revealed that there are 8 CERC-NFRAP sites within the searched area.

Site	Address	Map ID

W C HARDESTY	***6052 SHULL ST***	***95-8***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/11/2008 has revealed that there is 1 CORRACTS site within the searched area.

Site	Address	Map ID
FOREMOST MCKESSON INC MCKESSON	***5353 JILLSON ST***	***1-2***

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/12/2008 has revealed that there is 1 RCRA-TSDF site within the searched area.

Site	Address	Map ID
FOREMOST MCKESSON INC MCKESSON	***5353 JILLSON ST***	***1-2***

EXECUTIVE SUMMARY

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 4 RCRA-LQG sites within the searched area.

Site	Address	Map ID

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 34 RCRA-SQG sites within the searched area.

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 4 RCRA-NonGen sites within the searched area.

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 10/06/2008 has revealed that there is 1 US ENG CONTROLS site within the searched area.

Site	Address	Map ID
PEMACO INCORPORATED	*5050 EAST SLAUSON AVENU*	*24-2,5*

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 10/06/2008 has revealed that there is 1 US INST CONTROL site within the searched area.

Site	Address	Map ID
PEMACO INCORPORATED	*5050 EAST SLAUSON AVENU*	*24-2,5*

EXECUTIVE SUMMARY

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/31/2007 has revealed that there is 1 ERNS site within the searched area.

Site	Address	Map ID
N/B I-710, 300 FT N. OF FLOREN	N/B I-710, 300 FT N. OF	69-5

US BROWNFIELDS: The EPA's listing of Brownfields properites addressed by Cooperative Agreement Recipients and Brownfields properties addressed by Targeted Brownfields Assessments

A review of the US BROWNFIELDS list, as provided by EDR, and dated 10/01/2008 has revealed that there is 1 US BROWNFIELDS site within the searched area.

Site	Address	Map ID
BELL GARDENS, CITY OF	5614 SHULL STREET	94-8

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 10/21/2008 has revealed that there is 1 ROD site within the searched area.

Site	Address	Map ID
PEMACO INCORPORATED	***5050 EAST SLAUSON AVENU***	***24-2,5***

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2006 has revealed that there are 2 TRIS sites within the searched area.

Site	Address	Map ID
KOP-COAT, INC.	***5431 DISTICT BLVD.***	***8-2***
ENGINEERED POLYMER SOLUTIONS	***5501 E. SLAUSON AVE.***	***20-2,5***

TSCA: The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. The United States Environmental Protection Agency has no current plan to update and/or re-issue this database.

A review of the TSCA list, as provided by EDR, and dated 12/31/2002 has revealed that there is 1 TSCA

site within the searched area.

Site	Address	Map ID
CASTROL INDUSTRIAL NORTH AMERI	***5511 DISTRICT BLVD***	***10-2***

SSTS: Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

A review of the SSTS list, as provided by EDR, and dated 12/31/2006 has revealed that there are 2 SSTS sites within the searched area.

Site	Address	Map ID
CASTROL INDUSTRIAL WEST INC.	***5511 DISTRICT BLVD.***	***10-2***
LOS ANGELES CHEMICAL COMPANY	***4545 ARDINE STREET***	***93-7***

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 07/31/2008 has revealed that there are 3 ICIS sites within the searched area.

Site	Address	Map ID
PEMACO INCORPORATED	5050 EAST SLAUSON AVENU	24-2,5
PEMACO MAYWOOD	5050 EAST SLAUSON AVENU	24-2,5
PEMACO INC	5050 EAST SLAUSON AVENU	24-2,5

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 10/30/2008 has revealed that there are 40 FINDS sites within the searched area.

AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the AST list, as provided by EDR, and dated 11/01/2007 has revealed that there is 1 AST site within the searched area.

Site	Address	Map ID
CASTROL INDUSTRIAL WEST INC.	*5511 DISTRICT BLVD.*	*10-2*

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

A review of the DEED list, as provided by EDR, and dated 12/30/2008 has revealed that there is 1 DEED site within the searched area.

Site	Address	Map ID
SOUTHLAND OIL	*5619-5621 RANDOLPH STRE*	*44-5*

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, and dated 11/25/2008 has revealed that there are 3 RESPONSE sites within the searched area.

Site	Address	Map ID
SOUTHLAND OIL	*5619-5621 RANDOLPH STRE*	*44-5*
CUDAHY CITY PARKS	*5240 SANTA ANA ST*	*89-8*
LOS ANGELES CHEMICAL COMPANY	*4545 ARDINE STREET*	*93-7*

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, and dated 12/31/2006 has revealed that there are 42 HAZNET sites within the searched area.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/25/2008 has revealed that there are 25 ENVIROSTOR sites within the searched area.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

California - Hazardous Waste Tracking System - Datamart

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Map ID	Site	Database(s)	EPA ID Number

KOP-COAT, INC. (Continued) **1000138612**

corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No
Off-site waste receiver:	Commercial status unknown

Universal Waste Summary:

Waste type:	Batteries
Accumulated waste on-site:	No
Generated waste on-site:	No
Waste type:	Lamps
Accumulated waste on-site:	No
Generated waste on-site:	No
Waste type:	Pesticides
Accumulated waste on-site:	No
Generated waste on-site:	No
Waste type:	Thermostats
Accumulated waste on-site:	No
Generated waste on-site:	No

Hazardous Waste Summary:
Waste code: 212
Waste name: 212

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED

Map ID	Site	Database(s)	EPA ID Number

KOP-COAT, INC. (Continued) **1000138612**

SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2005

Annual Waste Handled:

Waste code: D001

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
- Waste code: 214
- Waste name: 214

- Waste code: 352
- Waste name: 352

- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Biennial Reports:

Last Biennial Reporting Year: 2005

Annual Waste Handled:
- Waste code: D001
- Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
- Amount (Lbs): 19760

- Waste code: D002
- Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
- Amount (Lbs): 2443

ENGINEERED POLYMER SOLUTIONS (Continued) **1000290932**

Waste code: 331
Waste name: 331

Waste code: 352
Waste name: 352

Waste code: 591
Waste name: 591

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2005

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are

Map ID	Site	Database(s)	EPA ID Number

COOK INDUCTION HEATING CO INCORPORATED (Continued) **1000266648**

transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description: The Pemaco Superfund Site (Pemaco) is a 1.4-acre site located at 5050 Slauson Avenue in the City of Maywood, California. Maywood is an urban area located in eastern Los Angeles County. The site is adjacent to a residential neighborhood, a residential park and light industry immediately to the south, a heavy industrial area immediately to the north, an abandoned industrial property to the west and it is bordered by the concrete lined Los Angeles River to the east.The former Pemaco site was used as a chemical blending facility and chemical distributor from the late 1940s until June 1991. Historically, the Pemaco facility consisted of a 22,000-square-foot warehouse in the northern portion of the property and 31 underground storage tanks (USTs) and at least six aboveground storage tanks (ASTs) in the south part of the site. Large quantities of chemicals were stored in the ASTs and USTs, which ranged in size from 500 to 20,000 gallons, and in 55-gallon drums stored sporadically around

PEMACO INCORPORATED (Continued) **1000144793**

the site. Several chemicals have been identified as chemicals of concern (COCs) for the Pemaco site. Chemicals of concern consist of trichloroethene (TCE), tetrachloroethene (PCE), benzene, toluene, hexane, ethyl benzene, methylene chloride, and vinyl chloride, as well as floating free product at multiple locations within the saturated zones.Pemaco, Inc. formerly operated a custom chemical blending and distribution facility at 5050 E. Slauson Blvd. in Maywood, California, from the late 1940s until 1991. A wide variety of chemicals were used onsite including chlorinated and aromatic solvents, flammable liquids, oils, and specialty chemicals. Marie B. Richardson was the owner of Pemaco, Inc. until 1984, at which time Lux International purchased the property (owner Lawrence Sze). Lux International operated the chemical blending facility until 1991 when they went out of business. No other use of the property is documented since 1991. Historically, the Pemaco facility consisted of a 22,000-square-foot warehouse in the northern portion of the property, and 31 USTs and at least 6 ASTs in the southern part of the property. Most of the chemicals brought to the site were delivered via railcar from a rail spur that branched out from the Los Angeles Junction Railway (LAJR) property west of the site.The first environmental investigation at Pemaco was performed by the site owner in 1990. Operations ceased at Pemaco during 1991. Between 1991 and 1994, approximately 400 55-gallon drums and three ASTs were removed from the site by order of the Los Angeles District Attorney's office. A substantial fire in 1993 destroyed much of the main warehouse building. In 1994, EPA Region 9 Emergency Response conducted a removal assessment at Pemaco at the request of Los Angeles County. As a part of this assessment, EPA removed six 55-gallon drums, installed fencing, and secured UST fill pipes with locking well caps. In June of 1995, EPA completed a preliminary assessment and site investigation at Pemaco. Pemaco was then entered into CERCLIS in 1995.From February through May of 1997, EPA's Superfund Technical Assessment and Response Team (START) completed an Expanded Site Investigation (ESI), which included collection of additional soil samples, installation of monitoring wells, sampling of new and existing wells, and an evaluation of Hazard Ranking System (HRS) factors. The final listing on the National Priority List (NPL) occurred on January 19, 1999.EPA completed additional removal activities at Pemaco between August 1997 and March 1999. Work included excavation and removal of USTs, air monitoring, building demolition, surface soil sampling, soil vapor monitoring, subsurface soil sampling, groundwater sampling, remedial pilot tests, design and installation of a soil vapor extraction (SVE) system, and operation of the SVE system. The SVE system operated between March 1998 and March 1999. By the end of August 1998, the SVE system had operated for 3,230 hours (134.6 days), and removed and treated approximately 90,000 pounds of hydrocarbons and solvents from vadose zone soils at the site. The SVE system was turned off on March 3, 1999 because the system had achieved its goals and because of community concern regarding the possibility of dioxin releases from the thermal oxidation unit.Between January 2001 and March 2002, the EPA initiated the Remedial Investigation/Feasibility Study (RI/FS) for the site. The draft RI report was reviewed by the EPA in October 2002. The EPA installed additional deeper groundwater sampling wells during the summer of 2003. EPA also conducted additional rounds of indoor air sampling in the neighborhood surrounding the site during March and May 2003.Based on the EPA's analysis of the previous indoor air sampling results and EPA consideration of a possible change to the TCE toxicity value, another round of air sampling was conducted during August 2003. The additional sampling effort was conducted to determine if the vapor intrusion pathway was causing a potential health risk via indoor air. The August 2003 sampling event was conducted to assess the need for an emergency removal action. The purpose of the action was to gain data so that the Agency could make a determination of whether or not soil vapor migration had caused migration of contaminants into the homes near the site at levels that would

Map ID	Site	Database(s)	EPA ID Number

PEMACO INCORPORATED (Continued) **1000144793**

pose an unacceptable risk. Sampling activities included the EPA offering homeowners across the street from Pemaco a 24-hour relocation while the EPA conducted the August 2003 indoor air sampling. EPA sampled approximately 28 homes during this sampling effort. The EPA subsequently analyzed the data received from this sampling round and previous sampling effortsand determined that a separate remedy for the homes was not necessary. However, EPA determined that implementation of the remedy for the Pemaco Superfund site would ensure that detectable levels of chemicals found in the soil vapor would decrease and prevent a possible future vapor intrusion problem for the residential neighborhood.EPA conducted a Potential Responsible Party (PRP) search for the Pemaco Superfund site and the final report was completed during 2004. The City of Maywood acquired the property from the Trust for Public Land (Trust) on December 30, 2002. EPA signed a prospective purchaser agreement with the Trust prior to the acquisition. The City of Maywood plans to construct a public recreational park on the former Pemaco site and five other surrounding properties.Remedial investigations have shown that there is a co-mingled groundwater plume existing between Pemaco and the W.W. Henry property which is adjacent to the site at 5989 District Boulevard. W.W. Henry operated as a manufacturer of batteries, cosmetics, and adhesive products at this location. The site stored chemicals in USTs and aboveground mixing tanks. The chemicals reportedly used on site included: PCE, 1,1,1-trichloroethane (1,1,1-TCA), toluene,hexane, naptha, methanol, mineral spirits, acetone, and isopropyl alcohol. The Pemaco RI detected PCE, toluene, and hexane that could be attributed to the W.W. Henry property in soils and groundwater. Although cleanup activities at the WW Henry property have been conducted via enforcement orders issued by the Los Angeles Regional Water Control Board, EPA issued a General Notice letter to W.W. Henry in January 2004 for this co-mingled area.The former Pemaco site is located in a mixed use industrial and residential area. All structures were removed from the site during the removal activities. The 1.4-acre site is currently a dirt lot with a small temporary storage trailer for EPA contractors. There is a remnant concrete pad that is orientated north-south and runs along the site's eastern border. The nearest residence is approximately 130 feet (ft) west-southwest of Pemaco's front gate located on the corner of District Boulevard and 59th Place. The residential neighborhood consists primarily of single-story homes of low- to moderate-income families and apartments on neighboring lots. Heliotrope Elementary School is approximately 0.3 miles west of Pemaco, and there are heavy industrial areas north of Pemaco, and north of Slauson Avenue. The lot directly south of the Pemaco site is comprised of an abandoned industrial site (former Lubricating Oil Services) and a small residential park. Immediately west of the Pemaco site is a 50-foot-wide railroad right-of-way that was used by Pemaco to load and receive products. There are two industrial properties on the west side of the tracks, one of which, the W.W. Henry property, has had several reported releases.The groundwater beneath the Pemaco Superfund site is considered a future potential drinking water source by the State of California. Thirteen water purveyors supply drinking water to approximately 339,000 people by drawing groundwater from 78 wells within 4 miles of the site. The nearest downgradient well from the site is located 0.3 miles to the south of Pemaco. There is also another downgradient well located 0.75 miles southwest of the site.The shallowest saturated zone within the Lakewood Formation is known as the Exposition Aquifer and is typically present between 65 ft below ground surface (bgs) and 200 ft bgs, however in the site area the Exposition is comprised of several thin saturated zones separated by aquitards and is not currently used for drinking water. The local production wells are screened in aquifers located in the deeper San Pedro Formation (-350 to 1,500 ft bgs).The City of Maywood currently owns the Pemaco property. The City has rezoned the property from industrial to recreational use. The City plans to build a

Map ID	Site	Database(s)	EPA ID Number

PEMACO INCORPORATED (Continued) **1000144793**

7.3-acre public recreational park, termed the Maywood Riverfront Park (MRP), on six properties surrounding and including the Pemaco Superfund site. The MRP is part of a larger Los Angeles River Greenway program and the Los Angeles River Master Plan. The plan for the park includes a playground area, soccer fields, basketball courts, native plant landscaping, picnic areas, restrooms, and possibly a swimming pool. Construction on the park began in 2003 and stopped until the City was able to acquire the last property to be incorporated into the MRP. Construction on the park will resume again in the next few months. If after implementation of the remedy, hazardous waste remains on the site at levels which are not suitable for unrestricted use of the land, additional institutional controls may be required in the form of a State of California Land Use Covenant with the City of Maywood.The perched groundwater under Pemaco is characterized as having poor quality and very low transmissivity. The Exposition groundwater Zone is not currently used as a drinking water source, so there are no other current or potential beneficial uses associated with groundwater under Pemaco.However, the Exposition groundwater zone is designated by the Los AngelesRegional Water Quality Control Board (LARWQCB) as being a potential drinking water source. Thus, EPA used as a basis for its reasonable exposure assumptions in its risk assessment (Appendix 6 of the RI) the possibility that the groundwater under Pemaco may be a source of drinking water.A Record of Decision (ROD) addressing Operable Unit (OU) 1 was completed in January 2005.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to

Map ID	Site	Database(s)	EPA ID Number

PEMACO INCORPORATED (Continued) **1000144793**

replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Summary Details:

Conditions at Proposal July 28, 1998): Pemaco Maywood is a four-acre facility that housed a chemical blending facility operated by Pemaco, Inc. between the late 1940s and 1991. Ha ardous chemicals stored at the facility in underground and aboveground storage tanks and drums included chlorinated and aromatic solvents, flammable liquids, petroleum hydrocarbons, and other volatile organic compounds. There were 31 underground storage tanks, six aboveground storage tanks, and more than 400 drums on site when the facility was investigated by the Los Angeles County Fire Department in 1992. During the Expanded Site Inspection ESI) conducted in May 1997, several volatile organic compounds were identified in near-surface and deep soilsamples, as well as perched ground water and an underlying regional aquifer. Floating product consisting of total petroleum hydrocarbons gasoline) and 12 volatile organic compounds was recovered from three wells drawing from the perched ground water. Aqueous samples from 10 other wells in the perched ground water one contained several chlorinated hydrocarbons such as tetrachloroethene PCE), trichloroethene TCE), 1,1,1-trichloroethane TCA), 1,1- and 1,2-dichloroethenes, 1,1-dichloroethane, and vinyl chloride. EPA installed four monitoring wells into the shallow regional aquifer 80 to 100 feet deep) during the ESI in May 1997. Ground water samples from three of the

Map ID	Site	Database(s)	EPA ID Number

PEMACO INCORPORATED (Continued) **1000144793**

four wells contained TCE ranging from 410 to 11,000 micrograms per liter. Although the monitoring wells penetrate a shallow regional aquifer of the Lakewood Formation, most of the drinking water wells within four miles of the site draw water from the San Pedro Formation. Approximately 100 feet of clay separate the Lakewood from the San Pedro Formation within two miles of the site. Thirteen water purveyors draw ground water from 78 wells within four miles of the site to supply drinking water to approximately 339,000 people. The nearest well tothe siteis 0.3 mile downgradient. The site is located next to the Los Angeles River; however, the river is not used for drinking water. There are no fisheries nor sensitive environments associated with the site. The site is in a mixed industrialand residential community, with a residential tract across the street. The Pemaco facility was a large quantity ha ardous waste generator when it was in operation. Regulatory involvement at the site has been limited to EPA, with some involvement from the Los Angeles County Fire Department and the City of Maywood. Status January 1999): EPA is considering various alternatives for the site.
The description of the site release) is based on information available at the time the site was scored. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices.

Comments:	ROD concurrence. Cleanup design will remediate shallow soils, regrade the entire site with clean soils and implement institutional controls. High vacuum oval-phase extraction is proposed for the upper vadose zone and a combination of electrical recompletesistance heating with vapor extraction and vaccum enhanced pump and treat for lower rafroze zone is planned initially a flameless thermol oxidizer will be used with a switch out to carbon for the soil vapor. Contaminated groundwater will be treatedwith UV oxidation.

Background Info:	Pemaco,Inc. operated from the 1950's until 1984 as a chemical blending facility and distributor, under the ownership of Marie Richards. In 1984, Lux International purchased the property and continued operating a chemical blending facility until 1991 under the ownership of Mr. Lawrence SZE. In 1991, the site became inactive. The property consists of 1.14 acres in a mixed residential and industrial neighborhood and is currently a vacant lot. As a chemcial bledning operation large quantities of chemicals where stored in 55-gallon drums, above-ground tanks, and thirty- one 500 to 20,000 gallon under ground storage tanks. A wide variety of chemicals were used on-site including but not limited to chlorinated and aromatic solvents, flammable liquids, oils and specialty chemicals.

Comments:	This is a generator and will be forwarded to L.A. County HW Program, attention: Jim Nishida.TRW PSI relocated to the site in 1988 and started full operation at the site in 1989 for design and manufacturing of titanium pressure vessel used in spacecraft applications. Prior to relocation, TRW assessed the site and identified potential impacts at several areas. Analytical data revealed the presence of toluene (240 ppm), TPH (2,600 ppm), and 1,1,1-trichloroethane (130 ppm) at 6 feet below the groundsurface adjacent to a paint spray booth. Also, in another area where oil-stained soilswere observed. Analytical data shows the presence of TPH is 52,000 ppm. A PEA is required due to the evidence of contamination at the site.

California - Hazardous Waste Tracking System - Datamart

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste name: 181

Waste code: 221
Waste name: 221

Waste code: 331
Waste name: 331

Waste code: 352
Waste name: 352

Waste code: 591
Waste name: 591

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description: The Pemaco Superfund Site (Pemaco) is a 1.4-acre site located at 5050 Slauson Avenue in the City of Maywood, California. Maywood is an urban area located in eastern Los Angeles County. The site is adjacent to a residential neighborhood, a residential park and light industry immediately to the south, a heavy industrial area immediately to the north, an abandoned industrial property to the west and it is bordered by the concrete lined Los Angeles River to the east.The former Pemaco site was used as a chemical blending facility and chemical distributor from the late 1940s until June 1991. Historically, the Pemaco facility consisted of a 22,000-square-foot warehouse in the northern portion of the property and 31 underground storage tanks (USTs) and at least six aboveground storage tanks (ASTs) in the south part of the site. Large quantities of chemicals were stored in the ASTs and USTs, which ranged in size from 500 to 20,000 gallons, and in 55-gallon drums stored sporadically around the site. Several chemicals have been identified as chemicals of concern (COCs) for the Pemaco site. Chemicals of concern consist of trichloroethene (TCE), tetrachloroethene (PCE), benzene, toluene, hexane, ethyl benzene, methylene chloride, and vinyl chloride, as well as floating free product at multiple locations within the saturated zones.Pemaco, Inc. formerly operated a custom chemical blending and distribution facility at 5050 E. Slauson Blvd. in Maywood, California, from the late 1940s until 1991. A wide variety of chemicals were used onsite including chlorinated and aromatic solvents, flammable liquids, oils, and specialty chemicals. Marie B. Richardson was the owner of Pemaco, Inc. until 1984, at which time Lux International purchased the property (owner Lawrence Sze). Lux International operated the chemical blending facility until 1991 when they went out of business. No other use of the property is documented since 1991. Historically, the Pemaco facility consisted of a 22,000-square-foot warehouse in the northern portion of the property, and 31 USTs and at least 6 ASTs in the southern part of the property. Most of the chemicals brought to the site were delivered via railcar from a rail spur that branched out from the Los Angeles Junction Railway (LAJR) property west of the site.The first environmental investigation at Pemaco was performed by the site owner in 1990. Operations ceased at Pemaco during 1991. Between 1991 and 1994, approximately 400 55-gallon drums and three ASTs were removed from the site by order of the Los Angeles District Attorney's office. A substantial fire in 1993 destroyed much of the main warehouse building. In 1994, EPA Region 9 Emergency Response conducted a removal assessment at Pemaco at the request of Los Angeles County. As a part of this assessment, EPA removed six 55-gallon drums, installed fencing, and secured UST fill pipes with locking well caps. In June of 1995, EPA completed a preliminary assessment and site investigation at Pemaco. Pemaco was then entered into CERCLIS in 1995.From February through May of 1997, EPA's Superfund Technical Assessment and Response Team (START) completed an Expanded Site Investigation (ESI), which included collection of

Map ID	Site	Database(s)	EPA ID Number

PEMACO INCORPORATED (Continued) **1000144793**

additional soil samples, installation of monitoring wells, sampling of new and existing wells, and an evaluation of Hazard Ranking System (HRS) factors. The final listing on the National Priority List (NPL) occurred on January 19, 1999.EPA completed additional removal activities at Pemaco between August 1997 and March 1999. Work included excavation and removal of USTs, air monitoring, building demolition, surface soil sampling, soil vapor monitoring, subsurface soil sampling, groundwater sampling, remedial pilot tests, design and installation of a soil vapor extraction (SVE) system, and operation of the SVE system. The SVE system operated between March 1998 and March 1999. By the end of August 1998, the SVE system had operated for 3,230 hours (134.6 days), and removed and treated approximately 90,000 pounds of hydrocarbons and solvents from vadose zone soils at the site. The SVE system was turned off on March 3, 1999 because the system had achieved its goals and because of community concern regarding the possibility of dioxin releases from the thermal oxidation unit.Between January 2001 and March 2002, the EPA initiated the Remedial Investigation/Feasibility Study (RI/FS) for the site. The draft RI report was reviewed by the EPA in October 2002. The EPA installed additional deeper groundwater sampling wells during the summer of 2003. EPA also conducted additional rounds of indoor air sampling in the neighborhood surrounding the site during March and May 2003.Based on the EPA's analysis of the previous indoor air sampling results and EPA consideration of a possible change to the TCE toxicity value, another round of air sampling was conducted during August 2003. The additional sampling effort was conducted to determine if the vapor intrusion pathway was causing a potential health risk via indoor air. The August 2003 sampling event was conducted to assess the need for an emergency removal action. The purpose of the action was to gain data so that the Agency could make a determination of whether or not soil vapor migration had caused migration of contaminants into the homes near the site at levels that would pose an unacceptable risk. Sampling activities included the EPA offering homeowners across the street from Pemaco a 24-hour relocation while the EPA conducted the August 2003 indoor air sampling. EPA sampled approximately 28 homes during this sampling effort. The EPA subsequently analyzed the data received from this sampling round and previous sampling effortsand determined that a separate remedy for the homes was not necessary. However, EPA determined that implementation of the remedy for the Pemaco Superfund site would ensure that detectable levels of chemicals found in the soil vapor would decrease and prevent a possible future vapor intrusion problem for the residential neighborhood.EPA conducted a Potential Responsible Party (PRP) search for the Pemaco Superfund site and the final report was completed during 2004. The City of Maywood acquired the property from the Trust for Public Land (Trust) on December 30, 2002. EPA signed a prospective purchaser agreement with the Trust prior to the acquisition. The City of Maywood plans to construct a public recreational park on the former Pemaco site and five other surrounding properties.Remedial investigations have shown that there is a co-mingled groundwater plume existing between Pemaco and the W.W. Henry property which is adjacent to the site at 5989 District Boulevard. W.W. Henry operated as a manufacturer of batteries, cosmetics, and adhesive products at this location. The site stored chemicals in USTs and aboveground mixing tanks. The chemicals reportedly used on site included: PCE, 1,1,1-trichloroethane (1,1,1-TCA), toluene,hexane, naptha, methanol, mineral spirits, acetone, and isopropyl alcohol. The Pemaco RI detected PCE, toluene, and hexane that could be attributed to the W.W. Henry property in soils and groundwater. Although cleanup activities at the WW Henry property have been conducted via enforcement orders issued by the Los Angeles Regional Water Control Board, EPA issued a General Notice letter to W.W. Henry in January 2004 for this co-mingled area.The former Pemaco site is located in a mixed use industrial and residential area. All structures were removed from the site during the removal

Map ID	Site	Database(s)	EPA ID Number

PEMACO INCORPORATED (Continued) **1000144793**

activities. The 1.4-acre site is currently a dirt lot with a small temporary storage trailer for EPA contractors. There is a remnant concrete pad that is orientated north-south and runs along the site's eastern border. The nearest residence is approximately 130 feet (ft) west-southwest of Pemaco's front gate located on the corner of District Boulevard and 59th Place. The residential neighborhood consists primarily of single-story homes of low- to moderate-income families and apartments on neighboring lots. Heliotrope Elementary School is approximately 0.3 miles west of Pemaco, and there are heavy industrial areas north of Pemaco, and north of Slauson Avenue. The lot directly south of the Pemaco site is comprised of an abandoned industrial site (former Lubricating Oil Services) and a small residential park. Immediately west of the Pemaco site is a 50-foot-wide railroad right-of-way that was used by Pemaco to load and receive products. There are two industrial properties on the west side of the tracks, one of which, the W.W. Henry property, has had several reported releases.The groundwater beneath the Pemaco Superfund site is considered a future potential drinking water source by the State of California. Thirteen water purveyors supply drinking water to approximately 339,000 people by drawing groundwater from 78 wells within 4 miles of the site. The nearest downgradient well from the site is located 0.3 miles to the south of Pemaco. There is also another downgradient well located 0.75 miles southwest of the site.The shallowest saturated zone within the Lakewood Formation is known as the Exposition Aquifer and is typically present between 65 ft below ground surface (bgs) and 200 ft bgs, however in the site area the Exposition is comprised of several thin saturated zones separated by aquitards and is not currently used for drinking water. The local production wells are screened in aquifers located in the deeper San Pedro Formation (-350 to 1,500 ft bgs).The City of Maywood currently owns the Pemaco property. The City has rezoned the property from industrial to recreational use. The City plans to build a 7.3-acre public recreational park, termed the Maywood Riverfront Park (MRP), on six properties surrounding and including the Pemaco Superfund site. The MRP is part of a larger Los Angeles River Greenway program and the Los Angeles River Master Plan. The plan for the park includes a playground area, soccer fields, basketball courts, native plant landscaping, picnic areas, restrooms, and possibly a swimming pool. Construction on the park began in 2003 and stopped until the City was able to acquire the last property to be incorporated into the MRP. Construction on the park will resume again in the next few months. If after implementation of the remedy, hazardous waste remains on the site at levels which are not suitable for unrestricted use of the land, additional institutional controls may be required in the form of a State of California Land Use Covenant with the City of Maywood.The perched groundwater under Pemaco is characterized as having poor quality and very low transmissivity. The Exposition groundwater Zone is not currently used as a drinking water source, so there are no other current or potential beneficial uses associated with groundwater under Pemaco.However, the Exposition groundwater zone is designated by the Los AngelesRegional Water Quality Control Board (LARWQCB) as being a potential drinking water source. Thus, EPA used as a basis for its reasonable exposure assumptions in its risk assessment (Appendix 6 of the RI) the possibility that the groundwater under Pemaco may be a source of drinking water.A Record of Decision (ROD) addressing Operable Unit (OU) 1 was completed in January 2005.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Summary Details:

Conditions at Proposal July 28, 1998): Pemaco Maywood is a four-acre facility that housed a chemical blending facility operated by Pemaco, Inc. between the late 1940s and 1991. Ha ardous chemicals stored at the facility in underground and aboveground storage tanks and drums included chlorinated and aromatic solvents, flammable liquids, petroleum hydrocarbons, and other volatile organic compounds. There were 31 underground storage tanks, six aboveground storage tanks, and more than 400 drums on site when the facility was investigated by the Los Angeles County Fire Department in 1992. During the Expanded Site Inspection ESI) conducted in May 1997, several volatile organic compounds were identified in near-surface and deep soilsamples, as well as perched ground water and an underlying regional aquifer. Floating product consisting of total petroleum hydrocarbons gasoline) and 12 volatile organic compounds was recovered from three wells drawing from the perched ground water. Aqueous samples from 10 other wells in the perched ground water one contained several chlorinated hydrocarbons such as tetrachloroethene PCE), trichloroethene TCE), 1,1,1-trichloroethane TCA), 1,1- and 1,2-dichloroethenes, 1,1-dichloroethane, and vinyl chloride. EPA installed four monitoring wells into the shallow regional aquifer 80 to 100 feet deep) during the ESI in May 1997. Ground water samples from three of the four wells contained TCE ranging from 410 to 11,000 micrograms per liter. Although the monitoring wells penetrate a shallow regional aquifer of the Lakewood Formation, most of the drinking water wells within four miles of the site draw water from the San Pedro Formation. Approximately 100 feet of clay separate the Lakewood from the San Pedro Formation within two miles of the site. Thirteen water purveyors draw ground water from 78 wells within four miles of the site to supply drinking water to approximately 339,000 people. The nearest well tothe siteis 0.3 mile downgradient. The site is located next to the Los Angeles River; however, the river is not used for drinking water. There are no fisheries nor sensitive environments associated with the site. The site is in a mixed industrialand residential community, with a residential tract across the street. The Pemaco facility was a large quantity ha ardous waste generator when it was in operation. Regulatory involvement at the site has been limited to EPA, with some involvement from the Los Angeles County Fire Department and the City of Maywood. Status January 1999): EPA is considering various alternatives for the site. The description of the site release) is based on information available at the time the site was scored. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991, or subsequent FR notices.

Comments:	ROD concurrence. Cleanup design will remediate shallow soils, regrade the entire site with clean soils and implement institutional controls. High vacuum oval-phase extraction is proposed for the upper vadose zone and a combination of electrical recompletesistance heating with vapor extraction and vaccum enhanced pump and treat for lower rafroze zone is planned initially a flameless thermol oxidizer will be used with a switch out to carbon for the soil vapor. Contaminated groundwater will be treatedwith UV oxidation.

Background Info:	Pemaco,Inc. operated from the 1950's until 1984 as a chemical blending facility and distributor, under the ownership of Marie Richards. In 1984, Lux International purchased the property and continued operating a chemical blending facility until 1991 under the ownership of Mr. Lawrence SZE. In 1991, the site became inactive. The property consists of 1.14 acres in a mixed residential and industrial neighborhood and is currently a vacant lot. As a chemcial bledning operation large quantities of chemicals where stored in 55-gallon drums, above-ground tanks, and thirty- one 500 to 20,000 gallon under ground storage tanks. A wide variety of chemicals were used on-site including but not limited to chlorinated and aromatic solvents, flammable liquids, oils and specialty chemicals.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments:	The Department received a U.S. EPA CERCLA PA report dated June 14, 1993. The site consists of approximately 12 acres. The report indicates that an electrical transformer with oil containing PCBs is on site may have been leaked. Also, the site is cTHE SITE IS CONTAMINATED WITH GASOLINE RELATED BENZENE, TOLUENE AND XYLENE. THE CONTAMINATION EXTENDING FROM 15 TO 40-45 FEET DEPTH AT A CONCENTRATION RANGING FROM 115-305 PPM BENZENE, 131-1010 PPM TOLUENE, 502-2266 PPM XYLENE AND 2,400 -17,400 PPMTRPH. THE CONTAMINATION WAS CAUSED BY LEAKS FROM AT LEAST ONE OF THREE USTS. ALSO, FUEL CONTAMINATION SUSPECTING AT THE EAST OF THE PUMP HOUSE OF THE PROPERTY. PCB CONTAMINATED TRANSFORMERS WERE ALSO FOUND AT THE SITE. LACDHS FILE INDICATED THE PRontaminated from the leakage of underground fuel tanks. The Department's contact with LA County, Department of Public Works indicates that the remediation activities at the site is overseeing by the County. Therefore, the the Department's involvemESENCE OF LEAD IN THE SOIL AT THE SITE. A PEA IS REQUIRED BECAUSE OF THE DOCUMENTED CONTAMINATION AT THE SITE.ent is unnecessary.

California - Hazardous Waste Tracking System - Datamart

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

APN: 6332-014-011
APN Description: Not reported
Comments: Oil recycler. Contaminants include oil, metals, acetone, benzene, and chlorinated hydrocarbons.Facility Identified: Eckhardt list. Site operated by Nalco Chemical Co.RMDL - The implementation of the RAP for the Southland site has completed. An engineered asphalt cap placed on this 2 acre site and a dual-phase soil vapor extraction system installed to remove VOC's in soil and in perched water.The Remedial Design for an engineered asphalt/concrete cap and a soil vapor extraction system was approved for this state orphan site.Removal Action: Temporary cap.The Five Year Review concluded that the engineered asphalt cap is in good condition. The SVE system is aging but levels of VOCs are still too high for site closure. Alternative vapor treatment terchnologies will be studied to reduce operating costThe Feasibility Study was completed.The report detailed the status of the VOC removal. DTSC approves the report and based on the data presented, will schedule a soil gas survey to determine soil vapor concentrations.A soil gas survey was completed which showed that VOCs from Southland have migrated from Southland to the neighboring former Cognis facility. Concentrations of VOCs on the Southland property have decreased to levels close to cleanup levels.A workplan to install an additional vapor extraction well diretcly adjacent to the former Cognis facility was approved. This well will remove VOCs that have migrated from the Southland property.SVE system operating normally. Benzene & vinyl chloride concentrations still high.The use of this 1 1/2 acre property is restricted to commercial/ industrial use. Further, the engineered asphalt/concrete cap and operating SVE system cannot be distrurbed.The second Consent Decree between DTSC, Saramco and Seeside was lodged in court on April 25, 1997.DTSC and Southland Oil signed a Consent Decree for settlement of DTSC costs. The cost recovery activity was completed on March 10, 1997.This 1.5 acre site which was a waste oil recycler is certified as meeting RAP remediation goals. Tanks and solid wastes were removed, a cap and a recorded deed restriction is in place, and on SVE system is in O & M.s.

APN: 6332-014-011
APN Description: Not reported
Comments: Oil recycler. Contaminants include oil, metals, acetone, benzene, and chlorinated hydrocarbons.Facility Identified: Eckhardt list. Site operated by Nalco Chemical Co.RMDL - The implementation of the RAP for the Southland site has completed. An engineered asphalt cap placed on this 2 acre site and a dual-phase soil vapor extraction system installed to remove VOC's in soil and in perched water.The Remedial Design for an engineered asphalt/concrete cap and a soil vapor extraction system was approved for this state orphan site.Removal Action: Temporary cap.The Five Year Review concluded that the engineered asphalt cap is in good condition. The SVE system is aging but levels of VOCs are still too high for site closure. Alternative vapor treatment terchnologies will be studied to reduce operating costThe Feasibility Study was completed.The report detailed the status of the VOC removal. DTSC approves the report and based on the data presented, will schedule a soil gas survey to determine soil vapor concentrations.A soil gas survey was completed which showed that VOCs from Southland have migrated from Southland to the neighboring former Cognis facility. Concentrations of VOCs on the Southland property have decreased to levels close to cleanup levels.A workplan to install an additional vapor extraction well diretcly adjacent to the former Cognis facility was approved. This well will remove VOCs that have migrated from the Southland property.SVE system operating normally. Benzene & vinyl chloride concentrations still high.The use of this 1 1/2 acre property is restricted to commercial/

	SOUTHLAND OIL (Continued)		**S101272774**

industrial use. Further, the engineered asphalt/concrete cap and operating SVE system cannot be distrurbed.The second Consent Decree between DTSC, Saramco and Seeside was lodged in court on April 25, 1997.DTSC and Southland Oil signed a Consent Decree for settlement of DTSC costs. The cost recovery activity was completed on March 10, 1997.This 1.5 acre site which was a waste oil recycler is certified as meeting RAP remediation goals. Tanks and solid wastes were removed, a cap and a recorded deed restriction is in place, and on SVE system is in O & M.s.

Background Info:	The Southland Oil site is a former oil refinery which is located on one acre of land in an industrial area of the City of Commerce. The Southland Oil site has been used for oil related businesses since the 1930's and has been under the ownership of the Ellison family since that time. In 1984, the Department's inspection of the Southland Oil site revealed several violations of hazardous waste laws including in- cineration of hazardous wastes without a permit. Later that year, the facility was closed for these violations. A remedial action order was issued

Map ID	Site	Database(s)	EPA ID Number

SOUTHLAND OIL (Continued) **S101272774**

in August 1986 to Mr. Ellison to characterize and remediate the site. In October 1986, the Department made a final determination of noncompliance and assumed responsibility for site characterization and remediation. A removal action (RA) was initiated in April 1989 and involved the removal of all hazardous waste. During the course of this RA, all grossly contaminated production related structures were demo- lished, and buried pipes and vaults were excavated. This RA was completed in October 1989. In May 1990, a temporary cap was installed over the site to prevent vertical and offsite migration of soil contaminants and to eliminate direct contact. This cap has effectively stabilized the site for the short-term, or approximately 7 years. Contaminants that have been identified include heavy petroleum hydrocarbons, polychlorinated biphenyls (PCBs), lead, halogenated hydrocarbons, aromatic and semivolatile compounds. Direct contact with the possible contaminants has been eliminated by the con- struction of the temporary cap. Potential impacts of contamin- ants on drinking water supplies is a concern, however contamin- ants have not yet migrated below perched zones. The health risk assessment had identified that 96% of the carcinogenic direct contact risk was due to the PCBs in one isolated area. This area was near the location of the underground vault and PCBs were found in concentrations up to 1100 ppm. A Removal Action was initiated, in which the Department excavated 280 tons of soil. The solid materials were removed from the site and disposed at the Kettleman Hills Facility. A deed restriction was signed on 03/19/02. The site is restricted to industrial use and the asphalt cap must not be disturbed Long-term stabilization of the site via cap and vapor extraction will occur when the final remedial action is implemented. A settlement Consent Decree was executed on January 24, 1997. An invitation to bid was prepared to hire a contractor to implement the RAP. England Geo Systems was hired and the implementation of the RAP for the Southland site has been completed. An engineered asphalt cap was placed on this 2 acre site and a dual-phase soil vapor extraction system has been installed to remove VOC's in soil and in perched water.

5619-5621 RANDOLPH STREET **N/A**
COMMERCE, CA 90040

CA BOND EXP. PLAN:

Reponsible Party:	DETAILED SITE EXPENDITURE PLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The RPs have been found in noncompliance with an order issued by the Department. Therefore, it will be necessary to utilize Bond funds to remediate this site. DHS will undertake appropriate cost recovery action. This site is not identified as an NPLsite, nor does it appear to be a likely NPL candidate. Therefore, it appears that federal funds are not a viable source of revenue for this site.
Site Description:	The site is an inactive oil reclamation facility.
Hazardous Waste Desc:	Oily wastes have been observed in onsite soils. An analysis showed the presence of chloroform, polychlorinated biphenyls (PCBs), acetone, benzene, and heavy metals. Waste asbestos has also been observed on the site.
Threat To Public Health & Env:	Piles of uncontained contaminated soils may release hazardous substances into the Los Angeles River, located near the site. There is heavy metal, asbestos and solvent contamination at unknown depths in the soil. Ground water contamination is suspected but has not been verified. Asbestos may become airborne and migrate offsite.
Site Activity Status:	The Los Angeles County District Attorney has obtained a conviction against one of the responsible parties for illegal storage and disposal of hazardous wastes. Phase I of the RI was completed in November, 1988. An IRM work plan is being prepared to remove all drums, tanks and sumps onsite.

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Violation Status: No violations found

FINDS:
Other Pertinent Environmental Activity Identified at Site

Registry ID: 110012185081

California - Hazardous Waste Tracking System - Datamart

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110002140665

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: In preparation for the Interim Remedial Measure a removal action was conducted. Approximately 2,108 tons of soil contaminated with petroleum sludge, heavy metals and landfill debris were removed from the site between July and September of 1990. CoCRU completed for the soil remediation only.ntaminated soils were managed as hazardous waste and transported to U.S. Ecology in Nevada. The IRM consisted of the installation of a passive gas venting system and a High Density Polyethylene Liner cap and was completed in October of 1990.

Comments: In preparation for the Interim Remedial Measure a removal action was conducted. Approximately 2,108 tons of soil contaminated with petroleum sludge, heavy metals and landfill debris were removed from the site between July and September of 1990. CoCRU completed for the soil remediation only.ntaminated soils were managed as hazardous waste and transported to U.S. Ecology in Nevada. The IRM consisted of the installation of a passive gas venting system and a High Density Polyethylene Liner cap and was completed in October of 1990.

Description: Site history indicated that the property was used for landfill operations during the 1930s to 1960s. The Site accepted oily sludge from service stations, refineries and oil development processes. In July 1989, a U.S. EPA-sponsored sampling resulted in the detection of contaminants including metals and semi-volatile hydrocarbon compounds. High levels of these contaminants were mostly detected in the area which is currently occupied by the baseball court. Potential pathway for contaminants were the soil, air and groundwater pathways. In April and August 2001 DTSC conducted an additional sampling investigation which confirmed the presence of metals and semi-volatile organic compounds (SVOC)s. A Removal Action Workplan (RAW) was approved in September 2003. In 2004 approximately 20,000 cu.xds. of contaminated soil were excavated and disposed at an approved hazardous waste facility. The basketball area will be excavated in the summer of 2005 which will completed the Remediation.

Background Info:	Site history indicated that the property was used for landfill operations during the 1930s to 1960s. The Site accepted oily sludge from service station, refineries and oil development processes. In July 1989, a U.S. EPA-sponsored sampling resulted in the detection of contaminants including metals and semi-volatile hydrocarbon compounds. High levels of these contaminants were mostly detected in the area which is currently occupied by the baseball court. Potential pathway for contaminants are the soil, air and groundwater pathways. In April and August 2001 DTSC conducted an additional sampling investigation which confirmed the presence of metals and semi-volatile organic compounds (SVOC)s. A Removal Action Workplan (RAW) was approved in September 2003. In 2004 approximately 20,000 cu.xds. of contaminated soil were excavated and disposed at an approved hazardous waste facility. The basketball area will be excavated in the summer of 2005 which will completed the Remediation.
Comments Date:	01202003
Comments:	RI reported and Risk Assessment was completed on January 20th.
Comments Date:	01272004
Comments:	On January 27, 2004, DTSC finalized the RAW for the Cudahy

NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Waste Code Addendum

SECTION 4 - EPA WASTE CODES

There are no epa codes to report for this search area.

Section 5

Databases Searched and Update Dates

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/29/2008

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2008
Date Data Arrived at EDR: 10/10/2008

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994
Number of Days to Update: 56

Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/07/2008
Date Data Arrived at EDR: 10/16/2008
Date Made Active in Reports: 12/08/2008
Number of Days to Update: 53

Source: EPA

Last EDR Contact: 01/30/2009
Next Scheduled EDR Contact: 04/13/2009
Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007
Date Data Arrived at EDR: 12/06/2007

Next Scheduled EDR Contact: 06/15/2009
Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 11/20/2008

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/12/2008
Date Data Arrived at EDR: 11/18/2008
Date Made Active in Reports: 03/16/2009

Data Release Frequency: Quarterly

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008
Date Data Arrived at EDR: 11/18/2008

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/12/2008

Next Scheduled EDR Contact: 05/18/2009
Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008
Date Data Arrived at EDR: 11/18/2008
Date Made Active in Reports: 03/16/2009
Number of Days to Update: 118

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/01/2008

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Next Scheduled EDR Contact: 04/13/2009
Data Release Frequency: No Update Planned

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/30/2008

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2006

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: Annually

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2006
Date Data Arrived at EDR: 12/11/2008
Date Made Active in Reports: 03/19/2009
Number of Days to Update: 98

Source: Department of Environmental Protection
Telephone: 860-424-3375
Last EDR Contact: 03/13/2009
Next Scheduled EDR Contact: 06/08/2009
Data Release Frequency: Annually

NJ MANIFEST: Manifest Information
Hazardous waste manifest information.

Date of Government Version: 09/30/2007
Date Data Arrived at EDR: 12/04/2007

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities
Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.
