

## EAST SAN FERNANDO VALLEY LIGHT RAIL TRANSIT PROJECT COMMUNITY LEADERSHIP COUNCIL (CLC)

### Overview

The Community Leadership Council (CLC) is an advisory body to the East San Fernando Valley Light Rail Transit (ESFV LRT) Project. The CLC promotes, fosters, and advances community-based dialogue and opportunities arising from the project. The CLC is comprised of a diverse group of 15 individuals who live, work, attend school, or own a business or commercial property in the neighborhoods within the project area: Arleta, Pacoima, Panorama City, and Van Nuys. CLC members will serve two-year terms throughout the life of the project as community representatives of their respective stakeholder groups. CLC members will hold quarterly community meetings and will work with Metro staff on project-related issues. Some examples include:

- > **Community Engagement:** support community engagement and dialogue on topics surrounding the project, such as landscaping, artwork, station naming, and streetscape improvements
- > **Economic Development and Business Support Services:** identify opportunities to help mitigate construction impacts, and for job creation and small business development within the project area, such as construction careers, Metro's Eat Shop Play, and Business Solution Center activities

### About the Project

The ESFV LRT Project is comprised of the Southern and Northern Segments. The **Southern Segment** is scheduled for advance utility adjustment in early 2023 with major construction beginning in late 2023 and a forecasted opening between 2028–2030. The Southern Segment will travel between the Metro G Line (Orange) and San Fernando Road along a center median on Van Nuys Boulevard and will add:

- > 6.7 miles of light rail
- > 11 new at-grade transit stations
- > Several Traction Power Substations (TPSS)
- > New Maintenance Storage Facility (MSF)

The **Northern Segment** of the project is in the planning phase. Metro is conducting the Shared Right-of-Way Study to consider design options for this 2.5-mile segment between the San Fernando Road/Van Nuys Boulevard intersection and the Sylmar/San Fernando Metrolink Station. More information on the planning and environmental clearance phase of the project is available online at [metro.net/eastsfvtransit](https://metro.net/eastsfvtransit).
