# Make Your LAX Connection

Metro is building a new transit station that will connect the Los Angeles International Airport (LAX) to the regional rail system.

In June 2014, the Metro Board of Directors approved adding a station to the Metro K Line at Aviation Bl/96th St that will serve as a transit “gateway” to LAX. Once complete, the LAX/Metro Transit Center station will provide the connection to a future Automated People Mover (APM) to be built and operated by Los Angeles World Airports (LAWA).

The project includes a new multimodal transportation center to connect LAX to the regional bus and rail transit system. Project components include:

- > A new light rail station to be served by the Metro K Line and a service extension of the Metro C Line
- > Bus plaza and terminal facility for Metro and municipal buses
- > Multilevel bicycle hub with secured parking
- > Pedestrian plaza
- > Passenger vehicle pick-up and drop-off area
- > Metro transit center/terminal building (“Metro Hub”) that connects passengers between the various modes of transportation, including a direct connection to the future LAX Automated People Mover

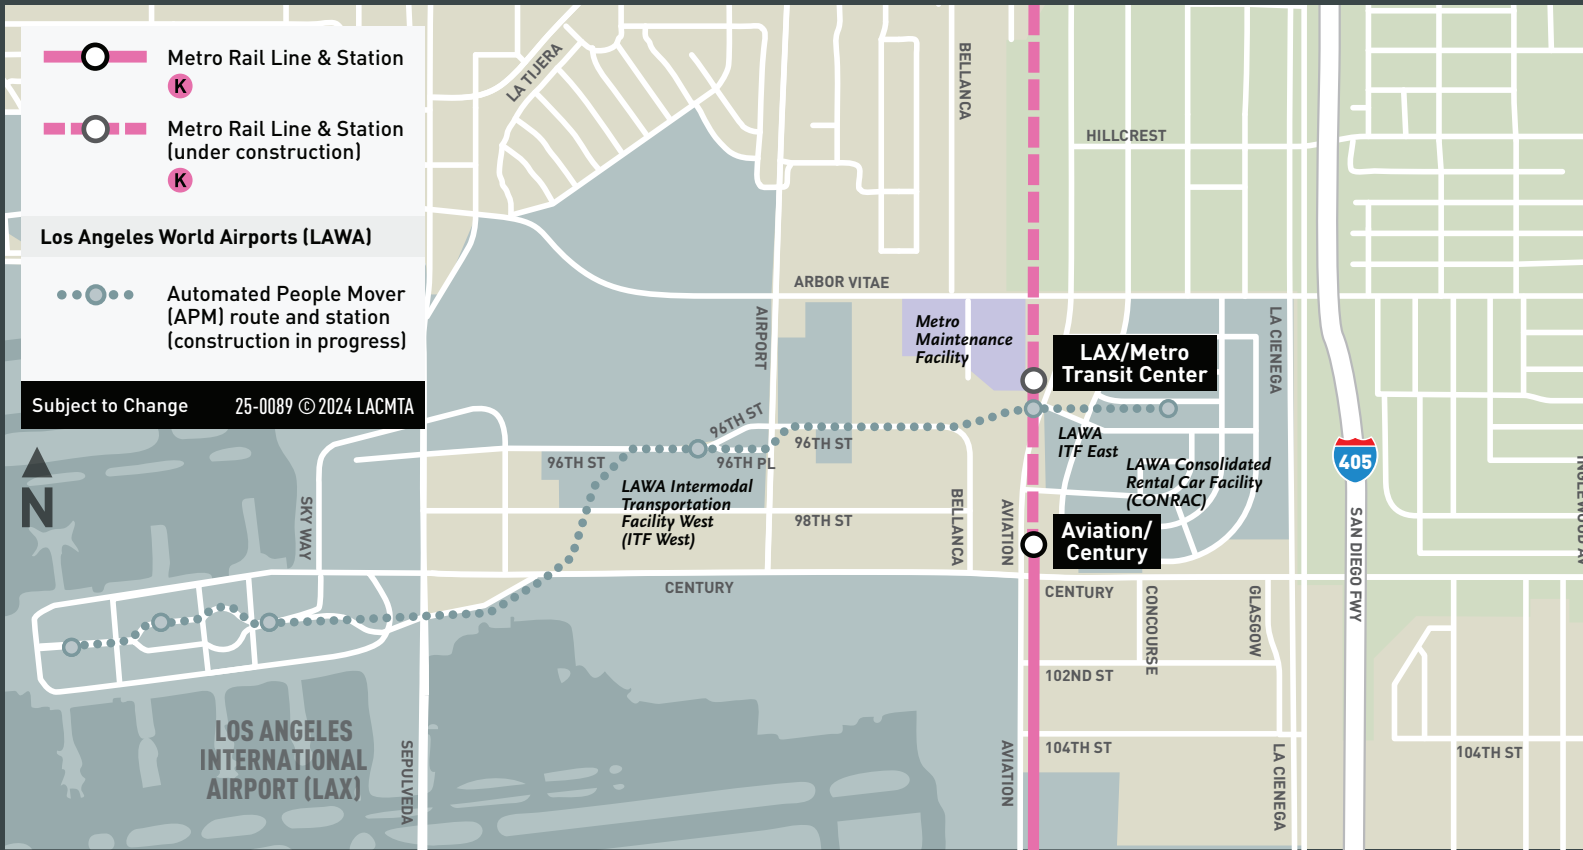

Metro Hub

LRT Platforms

# Project Location

Metro will continue coordinating with LAWA and area stakeholders throughout the construction of the new station.

Improving the connection between LAX and Metro's regional rail system is a key priority. The project is currently in construction and Metro (near Aviation Bl/96th St) continues to coordinate with LAWA on the connection to the APM.

Stay connected with the project by visiting the project website.
