D LINE SUBWAY EXTENSION PROJECT

Section 2 Fact Sheet – Station Locations

Metro[®]

SUMMER 2026

Overview

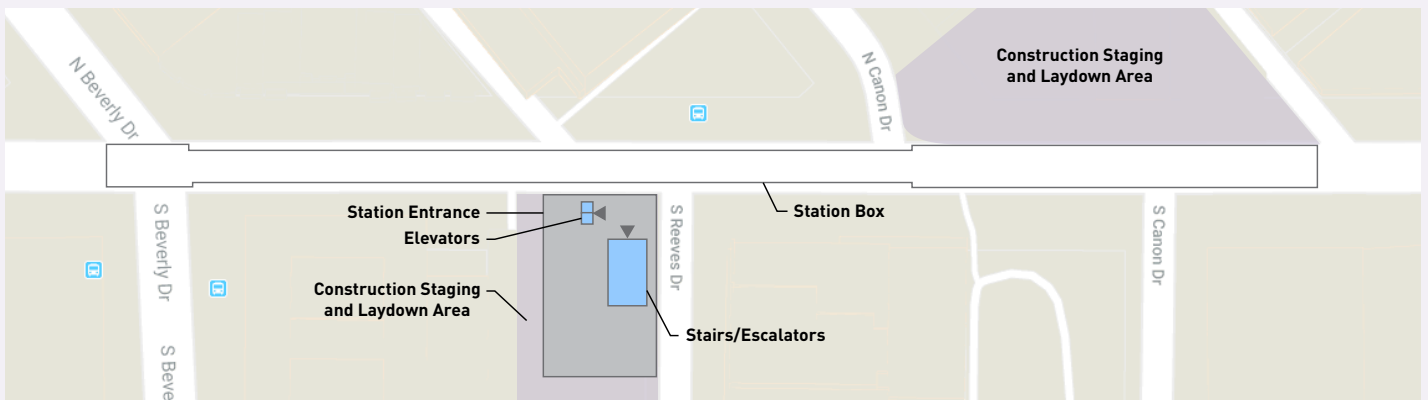

Section 2 includes 2.59 miles of additional tracks and two new stations at Beverly Dr and Century City. Section 2 of the D Line Extension Transit Project broke ground in February 2018.

Beverly Dr Station

The Beverly Dr station box is located under Wilshire Bl from Beverly Dr to Canon Dr, with the station entrance on the southwest corner of Wilshire Bl and Reeves Dr. There are two construction staging areas for this station, one at the station entrance, and the other on the north side of Wilshire Bl just east of Canon Dr. Located in the heart of Beverly Hills, the station will not only serve those who live and work in the area, but also visitors seeking to dine, shop and experience the Golden Triangle.

Rendering above shows how the Beverly Dr Station might look.

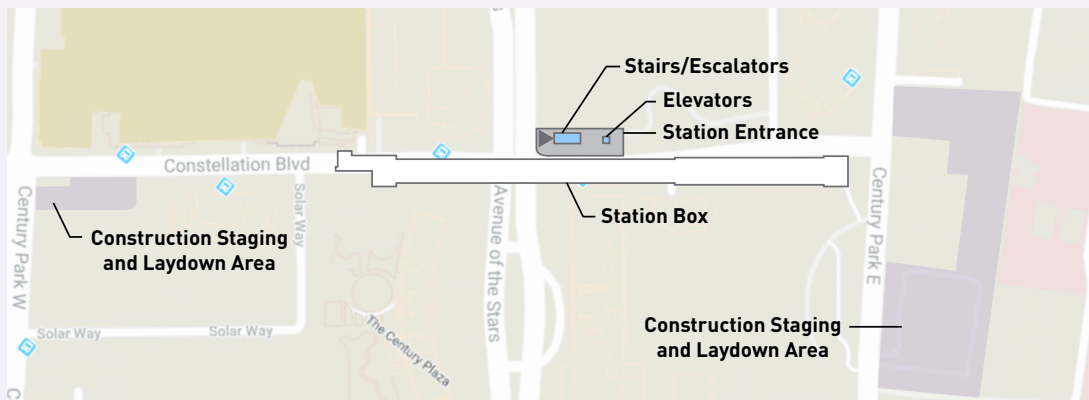

Century City Station

The Century City station box is located under Constellation Bl between Century Park East and Solar Way, with a station entrance at the northeast corner of Constellation Bl and Avenue of the Stars. In addition to construction staging areas at properties along Century Park East, construction staging is taking place on Constellation Bl between Avenue of the Stars and Century Park East. Situated in the center of one of the county's biggest job hubs, it is anticipated that thousands will board during their daily commute.

Overview

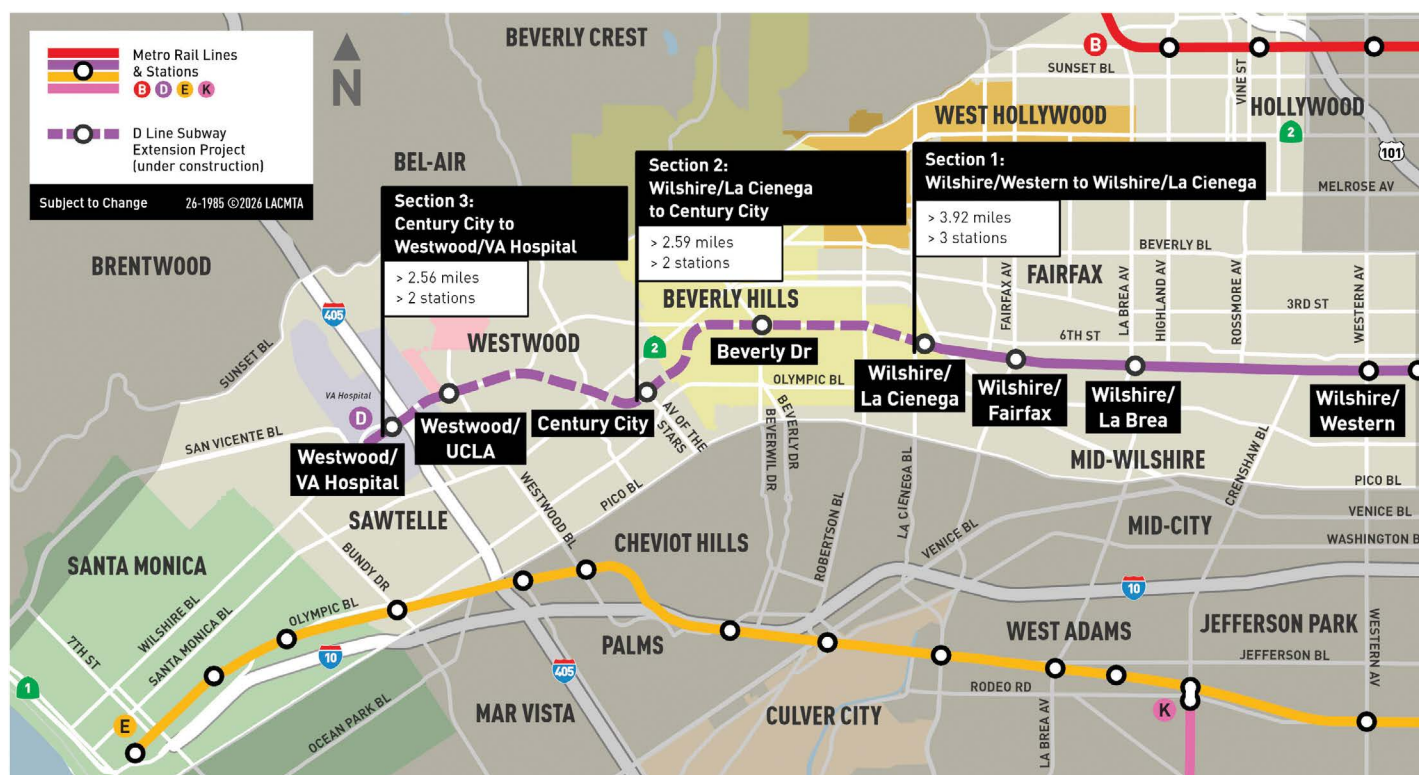

The D Line Subway Extension Project is a critically important rail project that will provide a high-capacity, high-speed, dependable alternative for commuters to travel between downtown Los Angeles and Westwood in just 25 minutes. The extension will be built in three sections and will continue from the current station at Wilshire/Western, extending westward for about nine miles along Wilshire Bl. The extension will include seven new stations at Wilshire/La Brea, Wilshire/Fairfax, Wilshire/La Cienega, Beverly Dr, Century City, Westwood/UCLA and Westwood/VA Hospital.

This new Metro Rail Extension will offer an alternative transportation option to congested roadways, provide significant environmental benefits and spur economic development throughout the country. Through improved connectivity, riders will be better able to use the entire Metro Rail System, municipal bus lines and other regional transportation services.

Project at a Glance

- > A 9-mile extension of the underground rail system from the current Wilshire/Western Station.
- > The Metro Rail extension will be built in three phases:
 - Section 1: Wilshire/La Brea, Wilshire/Fairfax, Wilshire/La Cienega
 - Section 2: Beverly Dr, Century City
 - Section 3: Westwood/UCLA, Westwood/VA Hospital
- > Life-of-Project Budget: \$9.7 Billion
