General steps to follow include:
1. Identify areas of cultural or regional significance
2. Study patterns of pedestrian travel, both formal and informal
3. Pinpoint ideal locations of wayfinding infrastructure
4. Partner with Metro and/or other relevant municipal departments
5. Design clear and consistent wayfinding infrastructure
6. Submit designs for review and permitting
7. Fabricate wayfinding infrastructure upon completion of review
8. Install wayfinding infrastructure
